What are the psychological complexes and mental health.

Each person can have psychological stresses, that spoil his life.

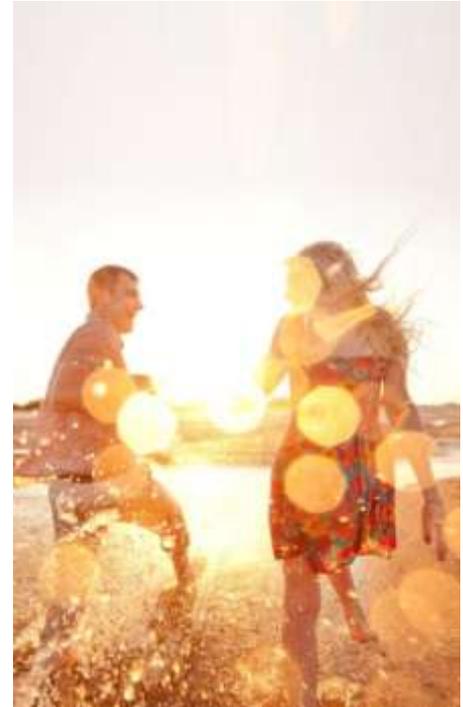

For example, - negative attitude to yourself - leads to bad mood and background discomfort.

- Boredom in relation to work - you do not want to work, the desire to constantly change your work.

- Negativity in relation to society - discomfort while in the city and a desire to be constantly in a deserted place outdoors.

- Shopping complex - the desire to spend all the money.

- Negative attitude towards men/women - gives discomfort when dealing with the opposite sex.

The negative situations in your life are for the most part associated with your complexes and phobias.

Complexes most often are caused by **stressful situations** in this or past life and represent information that is not processed by consciousness (stressful experience).

Due to the strong emotions during the emergence of this situation, it was probably difficult for the person to process this experience and now the subconscious leads us along the path of least resistance: you choose paths that are not associated with past stresses.

Hence, some people have strategies of family avoidance, money, society, etc.

Gradually, considering stressful situations, pumping up the energy of the Sun when viewing these aspects, or ordering the "Cleaning of complexes" service, you can gradually remove all basic human stresses and complexes.

Cleaning of complexes - the most popular and demanded service among the clients of our center! After adjusting the complexes, life becomes more pleasant, successful and harmonious.

To verify that you have psychological stress or blocks that can be adjusted - it is possible to order the **Psychological map of personality**.

It is clear that there are still signals, but the fact that the signal is already almost 2 times weaker due to the unwillingness to work, it is felt.

happened before and after various cleansing complexes: when I act in the area of the complex, whether it is the desire to get rich, sales, or simply the willingness to work, then the energy of consciousness is heavily consumed. And when the complexes are removed, there is no such energy leakage. That's about these changes.

Psychological complexes - this is what sets the excessive motivation of behavior, makes it necessary to act **irrationally**, create conflicts with other people. If you feel that some of the identified complexes bother you, **they can be cleaned!**

Cleaning of complexes will significantly increase your efficiency, add happiness and spiritual harmony! Cleaning of complexes is the most popular and demanded service among the clients of our center.

QUESTION: Why do I need to remove complexes?

ANSWER: Any complexes set the program of our actions. We act not sensibly, but under the action of emotions.

A person, instead of thinking and choosing what to do more correctly, will make a series of mistakes under the influence of complexes-programs that can negatively affect his life.

For example, Complex of theft response:

A wife cheated - the person didn't care, but she stole something - and the man got carried away and drove her out.

And suddenly a wife has a complex - kleptomania!

A person commits illogical emotional actions without regard to circumstances.

QUESTION: How does the service "Cleaning of complexes" go?

ANSWER: Work is carried out remotely. For work you need your photo in full growth.

Before work, you choose the wording of the complex/stress with which you need to correct.

During the week, the correction of stress takes place.

You yourself track how much your attitude to this stress/complex has changed. If necessary, additional corrections can be made for cleaning.

A number of stresses/complexes are removed quite quickly.

For some (if strong stress factors are not visible) cleaning of complexes takes a little longer. We work to the "enough" state.

Usually, after cleaning of complexes; the person acquires a calm attitude towards the straining factors. This work allows for a fairly quick correction in some cases instead of several months and years of psychological work.

DESCRIPTION. Service "Cleaning of complexes"

In each person's life, there are serious stresses that he could not cope with: severe divorce, humiliation, betrayal, physical and emotional abuse, etc.

These stresses create residual tensions in the body, for which a significant amount of energy is spent daily. A resource that a person could use in a creative way: learn a foreign language, work on family relationships, learn new things, move up the career path.

Our specialists have developed a technology **that removes complexes, stresses, phobias that have been forming in our personality over millions of years and create tension in various spheres of life.** Cleaning is done at the energy level. A person relieves tension and restores normal, adequate perception of reality.

Our job is to relieve energy tension and help the mind to process negative information. Stress is transformed into personal experience, a calm attitude to the source of unpleasant sensations appears. You need a photo and a clear description of stress, as well as an assessment of the degree of tension of the situation on a 10-point scale.

Work can take place with stressful situations in any area of your life:

Cost: Cleaning of complexes (stresses, phobias) - 25 USD

ATTACHMENT. Questions and answers.

The general principle of cleaning of complexes

There are different technologies for cleansing subconscious complexes.

In psychology, psychotherapy, methods of gradual analysis, recapitulation, consideration of situations with the provision of psychological support, etc. are used.

The general principle is to help a person finish processing stressful information, “**wipe out stress,**” using one or other auxiliary resources.

With the use of accelerated development technologies, the processing of this kind of information is obtained **hundreds and thousands of times faster**. Additional sources of energy are involved.

What therapists sometimes remove for years and longer, we now manage to remove in an hour or a few days.

Psychological Map of the Personality shows the complexes in all major areas of life. There are several types of manifestations of complexes:

- 1) **stupor, shyness in a certain area** (for example, sales or sex, communication with the opposite sex) caused by stress, fear in the past;
- 2) a complex can also manifest itself as a **negative attitude**, prejudice (for example, a complex towards people, society, money);
- 3) a complex can also manifest itself as an **active aggressive behavior** (for example, a complex as a reaction to aggression - with aggressive behavior in response).

In all cases, the complexes are caused by stresses in the past, often past lives, thousands and sometimes millions of years ago that a person could not cope with and which set a certain pattern of behavior of the current personality - fears and false motivations, limiting a person's freedom.

By gradually removing the complexes, you can restore your personal energy, and the interaction with the world can become more free and harmonious.

Removal of one complex, with which someone could suffer all his life - now you can conduct remotely, within a week or even faster.

QUESTION: If I have a complex, will it increase the complexes of my child?

ANSWER: If there are complexes of parents, their complexes change the behavior of the parents, but they do not change the complexes of the child.

In official psychology there is a theory that all complexes are formed in childhood.

Esoterics claims that a person has many lives and complexes could have been formed in past incarnations. As an argument, there is evidence that newborns have character and very specific complexes, a reaction to the surrounding reality, which could not have been formed in a short period.

Both theories are a tool for practice. Some part of the tasks can be solved using the theory of the formation of complexes in childhood. And there remains a part of the tasks that can be solved with the help of the model of multiplicity of embodiments.

Psychologists and esoteric often work together, complementing each other.

From our point of view, complexes are formed throughout the entire evolution, and the state of the parents affects the complexes in the child only partially.

Feature of the diagnostics and cleaning of complexes.

Diagnostics of complexes is a pretty curious process. The wording is very important here, as it guides the diagnostic process.

For example,

- a person can not read the signal of "negative attitude to the world", the attitude to the world is even, but there may be a signal of "fear of the world."

These are two different signals, two different complexes. When checking whether there is or is not a negative attitude towards this world - one complex is being tested here, but when analyzing fears - fear may appear towards the world - and this is another complex.

You can love the world, but be afraid of it. Like people, etc. To find the right key is an art.

Not all signals can be immediately found at the first cut. There may be tricky complexes: for example, I'm not afraid of dogs at all, but shaggy ones with long ears freak me out.

If, after cleaning one complex, there is still some tension, it often means that there are some other signals, hooks, in this area.

If we find and clean the main deep-seated signals, relief and relaxation happens more often when we meet the stressors. Extensive negative emotions usually do not arise anymore.

Sources of complexes.

The roots of the majority of psychological complexes in humans originated **millions of years ago** and then the similar stresses from incarnation to incarnation are superimposed, that creates a certain psychological frame of a person.

Cleaning of complexes thread (signal) by thread (signal) make life easier for us.

But the whole life does not change - we will be easier to treat stressors, and then we can change the model of behavior, if we have the necessary skills.

Complexes and phobias.

We can separate the concepts: complexes and phobias.

Under the complex, we understand the enhanced human response. And what reaction lies under it - fear, anger, etc. - can be any. Maybe a dozen options. One of the strongest emotions behind the complexes is fear.

Phobias are fear complexes that have a particularly acute reaction. Extensive phobias sometimes requires more time and attention. To work with phobias sometimes its required 2 cycles of cleaning.

Body map. Psycho-emotional muscle tension.

It's another layer of diagnostics. Besides psychological stresses now it is possible to test and relief the physical effect that psychological stresses effects on your own body, causing muscle tensions and illnesses.

Emotions experienced in stressful situations subsequently form the subconscious attitude of a person, and can also manifest themselves **at the level of the physical body as muscle clamps.**

Internal clamps are thoughts that block muscle endings. Internal stresses occur. A person may have a normal or good relationship to some parameters - but be internally clamped, feel constraint. For example, when it comes to sex, etc.

Major muscle stressed tensions that cause body weaknesses and illnesses are tested in the Body Map.

Individual diagnostics on request.

When we start working with complexes, we recommend starting with diagnostics and cleaning with the most common complexes. They are tested in a basic psychological map and an in-depth psychological map.

After the main complexes, which were found in psychological maps, are cleared, and you feel that it has really become easier for you, you can try to test more rare individual signals. To do this, as part of an in-depth diagnostics, you can tell about the features of your situation and we will try to check the aspect of your life that interests you for the presence of additional signals from psychological complexes.

Each person is individual, but we can try to find the keys to aspects of your life, remove the restrictions that hinder you and thereby make your life easier and more enjoyable!

CHARACTERISTICS OF THE MAIN COMPLEXES /EXPRESS DIAGNOSTICS/

"Complex of attitude to yourself" -

creates a constant emotional discomfort and in background negatively affects any processes. May create some constant irritability and background negativity, constant dissatisfaction.

"Complex of attitude to people" -

It makes it difficult to communicate with other people, creates an attempt to reduce communication with other people and reduces the ability to negotiate and sociability.

"Complex of attitude to life" -

Attitude towards life as a process, gives a general dissatisfaction with life. Even if everything is ok, a feeling that something is bad will still be there.

"Complex of attitude to society" -

It creates background discomfort and internal tension from being in a city or a large crowd of people. A person can relax only being alone in nature.

Complexes of "resistance to pressure" and "desire to put pressure" -

They create microtraumas of subtle bodies as a result of collisions with other people, cause unnecessary disputes, unjustified conflicts. It is recommended to clean these complexes in order to avoid injuries and breaks in the energy sector.

"Complex of negative attitude towards sex" -

sets conflict with some natural needs of the body and gives a subconscious reluctance, avoidance of sexual contact.

"Complex of boredom in relation to work" -

a person is very quickly bored with what he does. There is a desire to change jobs, to find something more interesting. There is a constant feeling that a person is not doing his job, that he has not found his vocation. Even a favorite job very quickly becomes annoying.

"Complexes in business, money, work" -

interfere with work, business. These complexes can make it difficult to find your vocation and earn good money.

"Complex of negative attitude to technology" -

Causes stress and rejection when working with computers, machines, etc.

Postpone homework for later.

One of the most common complexes in today's world is the desire to postpone homework for later. This complex is present in 70% of the world's population.

Fear for loved ones.

Interestingly, a person is more likely to fear for the life of loved ones than for his own. For example, when a close person swims at a depth or is at a dangerous height.

The desire to change places.

Often there is a psychological complex associated with the confidence that everything will improve due to a change of residence or work. And people concentrate on changing the situation, rather than on solving the problem itself. This complex is found in 60% of people.

Ignoring important and urgent matters.

One of the most common complexes, which is present in approximately 70% of people, is the desire to do something else instead of an important and urgent matter. At the same time, a person begins to watch movies, clean an apartment or shift things instead of taking up business.

Constraint and tightness.

Constraint is a fairly common complex. The average person has about 6 signals that cause a state of internal constraint. By ordering the cleaning of constraints, you can also check that you have internal tightness at the physical level. That is, there may not be constraints to some issues, for example, to money, sales, girls, sex you have a good attitude, but there are some old inhibitions inside your body. These inhibitions can also be removed, as well as psychological complexes.

Negative complex in relation to the holiday.

Many people have a psychological complex of negative attitude towards the holiday, which does not allow them to celebrate and have fun. It often happens when there is a party, but a person becomes sad.

Complexes can be present in the person himself and in the Higher Plans (in those systems in which he is included - in the Generic Egregore, in the Egregors of the Birth Systems of Souls, etc.).

If you are tormented by fears and complexes, then we will help you.

Stress and complexes.

FREQUENTLY ASKED QUESTIONS AND ANSWERS.

Issue of money and purpose:

QUESTION:

The issue of purpose and money - well, that is, the sphere of self-realization and the reasons for inactivity in it. (I have a lot of energy, but it is dormant inside and not implemented, there is no way out, although I have been looking for my application for a long time)

ANSWER:

The first step is to clean up the complexes, which interfere with professional activities:

This may include complexes of boredom in relation to work, attitude to business, sales, the desire to spend money, work causes meaninglessness, attitude to social growth and career, the perception of work as a loss of freedom, etc.

These complexes interfere with social implementation.

For a start, you can clean up the complexes that were found in the express map.

You can make a **Psychological Money Map**

and more thoroughly diagnose the topic of work and money.

QUESTION: I can not make money and do not know what I should do, can we focus on this? What does this mean?

ANSWER:

If it is difficult for a person to determine what to do, all questions related to what his vocation is, etc. more often, everything suggests that a person has a "attitude to work" complex. This complex can be cleaned. When removing complexes, some of the problems go away.

The main thing that prevents you from making money:

- lack of motivation to work (negative motivation in consequence of complexes to work),
- lack of professional skills
- lack of skills to sell yourself and your work (skills in the field of management, business, sales).

Most earn those who know how to sell themselves.

Very famous specialists, doctors, artists and musicians - most often have high experience in business and sales.

The presence of your subconscious professional experience is diagnosed in detail in the **Magic Map of the Personality**.

Issue of love:

QUESTION: What should I do with my private life, will it be happy at all?

ANSWER:

We specialize in the adjustment of psychological complexes.

Complexes simulate your behavior and as a result – situations, in which you find yourself.

You can check the availability of complexes in the sphere of relationships in the **Psychological Map of Love**.

<https://ezohata.com/catalog/details/229>

Issue of realization:

QUESTION: What is my purpose?

ANSWER: A person is desirable to engage in what interests him.

The parameter "**The main vector of development**" in the Express map of development will tell you what areas you have previously engaged in past lives and what you can do well.

Rarely is a mission very tough and prescriptive. Psychological complexes interfere with various areas of activity (attitude to work, business, etc.). If you adjust them, it will be easier to find your thing.

Most often, the question is what to do in life with a subconscious negative attitude to work - first of all, "boredom to work", secondly, "attitude to sales", business (psychological complexes). These complexes can be adjusted.

First, it is necessary to remove complexes that interfere with your professional activities (attitude towards people, money, work, sales, if any).

Secondly, it is a pleasure to choose what you like most.

Optimally do what you like.

It brings the greatest amount of pleasure and money.

And to improve in this area - to acquire knowledge.

In parallel, you need to study business issues, sales.

These are always necessary conditions: specialty + knowledge in the field of business and sales.

You can build a business system based on your favorite profession. Just being an expert, you won't make any money. You also need to be able to sell your skills and knowledge.

Review: Cleaning of complex to magic and esoteric /Olesya:

Thank you for the free cleaning of this complex. I have always had a great interest in esoteric, but I studied it superficially and with varying success. All the time something hindered like a block. It took 3 months after the cleaning of the complex, and now I can say that I feel the direct need for a deeper study of magic and esoteric. Very exciting! Thank! P.S. Review: Cleaning of complex of stupor /Olesya:

Hello.

As promised to write about the complex of stupor, which is cleaned now. It worked. I get up and do things. It became easier. Maybe my mandala winner works too, which I constantly wear.

Review: Cleaning of complex for wife of fear of talking on the phone in English with strangers "/>Dmitry

My phone calls. You know, there's probably a change. Maybe there is no pleasure, but there is not much stress already. I was called several times and they called me, in principle, more or less normally. This does not mean that I suddenly began to understand English better, but I do not notice such a rejection as before.

Review: Cleaning of complex of reaction to what is happening at work /Dasha:

Good evening! Today was as usual a very nervous day at work - I noticed that the excitement and tension from stress do not penetrate as deeply as before. As if only on a tangent I am touched, a certain detachment appeared. This does not affect the quality of work). On a 10-point scale, score 3 is still felt. But the difference is already very cool. It's interesting how tomorrow will be - it's scary to believe that work will no longer harass as before).

For those complexes that were previously cleaned, I did not even write - the realization did not immediately come that they disappeared). It is difficult to describe in words. Freedom! Calm. No sedatives have ever helped. And then bang and that's all. Like a new person was born inside). The rest of the complexes would be cleared faster))

Review: Cleaning of complex of boredom to work /Yaroslav:

Hello, I want to thank you for the service provided. Cleaning of complex to work / boredom, I want to draw attention to the fact that it took about 2 months to build up the process. I noticed a change in attitude to work, for 3 months I have been working on a fairly simple physical job, a change in attitude is manifested in the fact that I willingly follow the instructions of my superiors, I treat the company in good faith as my business, time flies quickly and I am not bored, have good relations with the team and with the authorities, before everything was quite the opposite.

3. The desire to argue, fight, push.

Review: Cleaning of complex of desire to argue /Svetlana:

Hello. I want to write a small review on the complex "desire to argue." So, there appeared a deeper acceptance of life itself, of some current processes, without resistance. It became clear what kind of stress this complex gave only after it was removed. The cleaning itself was very hard, I thought Anahata would break, then another cleaning up for several days. But such complex stresses should definitely be removed.

I think Anahata takes on such a load because the bottom connection is weak. In general, there are still a lot of things ...

Now I am ok. Of the effects - well, perhaps, some ease of communication appeared. Thanks to the Master for the work. Processed some very significant piece of psyche ...))

Review: Cleaning of complex of desire to argue /Nadezhda:

Hello. Many thanks to your team for the work done. That's cool!

After cleaning the complex of the desire to argue, I can say the following: the complex of the desire to argue is gone immediately. The feeling is as if you understand what you are getting involved in and do not allow it. You make a conscious choice in favor of common sense.

Review: Cleaning of complex of desire to push /George:

Greetings, the effect began to be felt immediately, if before the pressure of others rested on something in me, now there is no such thing. The pressure of others seems to fail. My desire to push as a response to pressure began to be felt keenly. In general, life has become much easier)

Review: Cleaning of complex of desire to push /Nadezhda:

Thank you for cleaning the complex of desire to push! I realized that I am not emotionally involved when I voice my position. It is very cool!

At first there was a state of some kind of "breaking up" or something. It's like: how you didn't do that in that situation! One night I didn't sleep at all, I was spinning it all in my head and even scolding myself that I should have pushed or flared up.

The reverse complex of resistance began to be felt. I will urgently clean it. Thanks to your team!

Review: Cleaning of complex of desire to push and resistance to pressure /Sergei:

Cleaning was a great success) Previously, you diagnosed a signal of 3 units. Now I think a maximum of 1. After cleaning the complexes of the desire to push and resistance to pressure, there are much less conflicts, it became easier to treat some situations. I feel that the energy that used to go to fight with the outside world, now comes to me and is headed in the right direction.

Review: Cleaning of complex of resistance to pressure / Svetlana

Regarding the cleaning of the complex "Resistance to pressure" / "Desire to push" I can't say a lot, but what about both complexes - it feels like some tension has gone. I think that the effect will continue to grow for a while. Probably, this also has a beneficial effect on the energy sector, since, unequivocally, some forces are spent on maintaining and processing the complex.

4. Food & Fitness

Review: Cleaning of complex to run /Anton:

They cleaned me a dislike for running. Now I will leave the house, and notice myself already running. It became natural to run, thanks!))

Review: Cleaning of complex of desire to overeat /Olesya:

The complex of desire to overeat I especially needed now. Since I am preparing for a fitness competition, I have all the food weighed and counted. But I always wanted to eat something else. Already today I began to observe and already noticed that I can stop in time.

Review: Cleaning of complex of desire to overeat /Karina:

I really feel the effect, now I am even more quickly satisfied and not so greedy, I do not cram food into myself, more awareness appeared during the meal. Thank you.

Review: Cleaning of complex of desire to overeat. /Oksana:

Good afternoon, I would like to leave a review after working with the child, your masters cleaned him two complexes - the fear of hunger (discomfort as soon as you get hungry) and the desire to eat from the higher plans. I observe how the child has become more patient in waiting for food, not naughty, when he needs to wait, it became easy for him to "hold out" from lunch to dinner, and earlier, barely leaving the table, he started asking for more and more food, I just didn't I understood how and why a child wants to eat so much! After ordering the Habits Map, everything became clear to me. Huge gratitude to you all!

5. Education, children and parents

Review: Cleaning of complex to learning /Alice:

Regarding my daughter - we had a big problem with studying and her strong reluctance to listen to someone and learn! She refused at all!

With her, we cleaned 2 or 3 pieces of complexes to learning, the reluctance to listen and blocking of thinking was removed.

Now, over the evening, we can learn a couple of poems, write a page in the copy-book and do more exercises in mathematics! This is a breakthrough, this is a great result. THANK YOU VERY MUCH, WE HAVE RADICAL CHANGES IN OUR FAMILY FOR THIS YEAR.

Review: Cleaning of complex to argue /Alice:

I want to give feedback on the cleaning of children's complexes, the complex of desire to argue was cleaned in the older one, the fear of movement and the fear of enemies, we moved and were very worried how he could adapt in the new environment and school, the fact is that he was constantly under attack. He constantly got involved in some things, could not fight back, although for several years he went to wushu and karate, in short, we had a serious problem with the boy! Now, in the new school, he, too, is always in conflict, but recently, about a month ago, he began to defend himself! Twisted the offender and kept him until the guard came! Everyone saw that he was attacked in the school hallway right behind! Now Misha is winged, he feels much more confident, he is trying to stand up for other boys, of course his behavior has changed very much and now he happens to start a fight for no apparent reason — I think so, but my son is slowly becoming a Man from the victim! I am grateful.

Review: Cleaning of complexes and stresses /Alexandra:

Hello! Many thanks to your masters for removing our complexes, mine is a negative attitude towards the son and one of the complexes of the son is a negative attitude towards the mother! Even before the report was received, there was a lightness in relationships, I began to accept everything that irritated me in my child, I became restrained without an effort of will, but simply because everything suits me so much, it all feels so great, it's amazing!!! Finally, I get joy from my son, pride in him, I used to want to shove him into some kind of incomprehensible framework and I was constantly dissatisfied with him, and he, too, became softer to me, I began to hear more often - Mom, I love you!))

6. Complexes for life and holidays

Review: Cleaning of complex of boredom of life /Alia:

Good afternoon!) Thank you for the information)) After cleaning the complex of the boredom for life something brightened in the soul. It is this word - "brightened." I will observe))) In general, there are a lot of things that I want to clean.

Review: Cleaning of complex of happiness /Marina:

After cleaning the happiness complexes I feel great) The state has changed in the last 2 days approximately. It became somehow easy. I was in a good mood more, there were lightness and tides of happiness, as if flying and hovering somewhere high))

Review: Cleaning of complexes and stresses /Andrew:

This is a cool thing, cleaning the fun complexes! I used to be rather skeptical about the holidays. And now sometimes out of the blue there is a desire to dance, sing along. Some kind of common light drive is present :))

Review: Cleaning of complexes and stresses /Natalia:

Cleaning of complex to the holidays. Usually I get around the party and ignore it. No motivation to be there. After the first cleaning, I noticed that the mood was internally active and cheerful, and I wanted to communicate with others.

Review: Cleaning of complexes and stresses /Ignat:

Cleaning of complex "Negative reaction to what is happening".

Thank you very much for working with mom! The result is real - permanent depression is gone.

Review: Cleaning of complexes and stresses /Svetlana:

Regarding the complexes - attitudes towards people and attitudes towards life.

Feel like you cleaned up well.

The attitude has changed. It became much easier to live.

And the environment changed dramatically.

Review: Cleaning of complexes and stresses /Michael:

After adjusting the complexes of a bad mood, an easy joyful state arose. Even in some difficult situations there is no such tension.

After adjusting the complexes of happiness, a lucid state of mind arose. As if part of the load from the soul is gone.

Feedback on cleaning the complex of attitude to yourself. There was a light, barely perceptible sense of optimism, the St. Petersburg weather stopped being a burden. Such a state appeared (it is even difficult to put it into words) of some satisfaction, perhaps. For example, if I was doing some unloved thing, then I used to feel sorry for myself, but now I just do it and do not feel unpleasant emotions. YES, and again I repeat, after cleaning one or the other it begins to be felt more strongly.

Review: Cleaning of complex of negativity to yourself / Valeria:

The task is to reduce the critical attitude to oneself, towards non-judgmental acceptance.

Result after work: - what about the love of myself, I begin to feel the changes). About myself - I have butterflies in my stomach))). From what I am unique, amazing and cool right now, and also from what I can be, I want to be and which one I will accordingly)).

I begin to appreciate the enormous potential and development opportunities that are in me, so I want to please myself, indulge, fulfill desires, develop talents, surround with care, love and all the best in this world, care and cultivate, invest in myself not out of necessity or for the sake of something, but out of love! Colossal effect). I'm very glad).

And another interesting observation - now I don't try to look at myself from the perspective of an observer, but I look at the world as if from within myself - I take interest in everything around me and keep track of what I feel, like me, how I feel with this, what I want, and not I look like at this time.

Review: Cleaning of complex of attitude to yourself / Alice:

Happy and elevated condition, but as always after your work!

It became easier to rise above the routine and everyday life and make fun of some work situations. And I have more strength! Hooray!

I am very grateful to YOU that you are and that YOU help people to change for the better. THANKS.

Review: Cleaning of complex of shyness / Nicholas B.:

Somehow I caught myself thinking that the word "shyness" had gone from my vocabulary!) I felt a change. Suppose, at the sight of pretty girls, cockroaches would immediately climb into their heads "Do not come, she's certainly not alone, what would you say to her". Now this is not). Well, and so on. Even in communication with colleagues ease and simplicity appeared. Without backward thoughts. I look forward to continuing to work with experts.

Review: Cleaning of complex of attitude to yourself /Ivan:

Greetings. I observed. A sense of integrity, self-discipline appeared, it was a sense of oneself, and not pieces of it. Now I can calmly talk about myself, about my feelings.... I'm really feeling this and realizing that this is me, that this is mine ... let's see how things go next.

Review: Cleaning of complex of attitude to yourself /Tatiana, Moscow:

I want to note the results of cleaning in relation to myself and the influence of the opinions of others: there was a constant confidence that I was right. And this is so important for a person who has always doubted himself, the correctness of his actions and deeds. Now, what would I do, even if something goes wrong - I just know: I'm right and I don't care who or what thinks about it — I just had the feeling that I was breathing deeply and began to drink life in big gulps.

Review: Clean of complex to your appearance /Nadezhda:

I thank you very much, for some reason, after this cleaning of the complex, the negative attitude towards my appearance and self-doubt became so easy on my heart, as if the stone was removed from my soul, it became easier to breathe, as if the light had let in me, amazing sensations, in general everything you are doing, it is difficult to describe, this is at the level of sensations, but definitely, these are bright energies!!! You are doing magical things, it is amazing how lucky I am that I met you, I hope for further cooperation, I will be with you!!! Thanks!!!

Review: Cleaning of complex of attitude to yourself /Vera, a psychologist:

Getting rid of psychological complexes is a completely new method for me, which was hard to believe, however, which also attracted by its simplicity. Having tried with one complex - I was removed dislike for myself - there was a feeling that I was free from heavy chains that bound my whole life. This is incredible, but true. Now I understand that I spent so much energy on a vain struggle with my complexes, always turning out to be a loser. Now, after removing a few more complexes that most disturbed me in relations with myself and the world around me, I understand that this is an invaluable gift for me from the Universe. I warmly thank the site team! And I highly recommend to all users - try it! You will very quickly feel the change for the better. 8. Cleaning of fears and phobias

Review: Cleaning of complex of fear of heights /Tatiana, Moscow:

I have the fear of heights removed. I want to talk about how it was before and after: from childhood I was very afraid of heights, I remember how I had nightmares when I was little, how I needed to cross the railway bridge, but I could not walk on it .. Many times this happened in my life and I just started to panic or had stupor. I did not know how to jump from one edge of a small pit to another I could not go to the balcony, go out on it and look outside. When I entered the elevator, my heartbeat always increased, and I was always terrified of them. My patience came to an end when I was at a deep-seated metro station, where there was a very long escalator down I simply could not go down on it. After that, I asked for help at the center and asked to remove this fear - the Fear of Height. It took quite a bit of time and I noticed that I was on the machine myself going down that ill-fated escalator downward without the slightest fear and looking back. The thought that I am about to fall does not even arise. I am not shaky and my head is not spinning. I also stopped being afraid of elevators and now I am calmly in the elevator and can wait for someone in it, without going to the floor, as I used to do. A particularly nice bonus was to feeling that I stopped being afraid to fly in an airplane. This is just an indescribable feeling. Since except, as about the journey and an interesting book, which I like to read on the plane, I no longer think either during takeoff, or during flight, or during landing. This is just wonderful! Thank you very much!!!

Review: Cleaning of complex to fly on an airplane /Irina, Kiev:

Up to 30 years, all my travels were a land mode of transport, and subconsciously, surprisingly, I was not drawn to distant countries. When for the first time there was a question of travel related to flight, I was first covered by an internal panic, and I realized that I would not fly anywhere, without any explanations, and I sabotaged the journey several times in my family. This lasted until I realized and called for myself this fear of flying on airplanes. I turned to the specialists of the center, I will say that this fear did not go away at once, I was warned that some phobias may have very deep, subconscious roots, but at least I began to consider the options of flights not far, 2-3 hours away.

I wanted more, I asked this question to clean up as much as possible, and a miracle happened!) I fly far and long, the fear of flights has gone. Thanks for the work!)

Complexes in domestic animals.

NOTE: Pets form the same complexes and stresses as people. Especially larger animals (cats, dogs, horses) - i.e. those who have a mind and a stable soul that is capable of rebirth.

For example, such as: negative attitudes towards people (it occurs often). The animal lives with us, but does not like it, tolerates people. Often it is said about cats that they tolerate people. Attitude towards food (maybe psychological hunger-not wanting to eat), attitude to other animals, attitude to transport. Any animal has several complexes.

Accordingly, it is possible to reduce the aggressiveness of the animal, to make behave better with you. You can increase the consciousness of the animal, make it smarter.

REVIEW: Cleaning of complexes and the addition of brains

We made the little dog terrier Shanti a service "Smart animal". She had a problem - for any reason she tried to escape where it wasn't necessary and she never stopped barking, everyone was tired of her, there were problems with her neighbors. And she was goddamn stupid.

They removed her complexes and added brains.

She has already started to bark less since the second day, it was already visible by her behavior. It was easier to walk for more than a week later, she didn't run away. A month later, she already had a glimpse of mind in her the eyes, the dog had an understanding, she began to listen to the owners, it was already possible to communicate with her.

REVIEW: Cleaning of complexes of a dog / Nina

My dog Masha did not want to eat anything. Generally, the complete lack of appetite. Only drank coffee with pleasure. I ordered the removal of complexes. Masha began to eat like crazy. Began to constantly ask for food. There was a second problem with overweight. Then they tested the complex of hunger. And when removed, the problems disappeared. Thank!

REVIEW: Cleaning of complexes of a cat / Lia

My cat came from the street and stayed with me to live. He had a problem - he was shouting implacably, as if his eggs were squeezed in a vice. Worked with his complexes to shout and gradually he fell silent. He avoided caresses. He did not like being stroked. They removed the complex of attitude to people - and gradually he became a tame cat.

He also terribly did not like little children. If the child came, he scratched him. Removed the complex - the neighbors' children began to drag him by the tail. And in the end I decided to ask him to strengthen the consciousness. The cat has become much smarter. But the following problem arose - he began dragging live pigeons into the streets. And half-dead, as gratitude. First, we buried them all together, every day. Then we began to cook them.

But the cat has become very clever and overly independent.
