MIND MAGIC - PERSONALITY TEST

1. Diagnostics of the position of the Assembly Point/level of development.

<p>Assembly point (current level of accumulated data)</p>	<p>Above Manipura</p> <p>The position of the Assembly Point can speak about the current level of consciousness and indirectly can reflect the level of development. The higher is the Assembly Point, the more information has been accumulated on past incarnations.</p> <p>In people who are interested in spiritual development, the Assembly Point is often located between Manipura and Anahata.</p> <p>The position of the Assembly Point is also influenced by communication with other people. The “<i>Mental Restoration</i>” technology allows you to restore mental mass and strengthen the position of the Assembly Point at a higher level.</p> <p><i>/ Detailed explanation - in the Appendix to the Magic Personality Map.</i></p>
<p>The shift in the elements (displacement of the Assembly Point)</p>	<p>Fire - Earth - Water - Air: 80/20/0/0%.</p> <p>The centered version is considered Fire-Earth. If you are in a society, you are actively communicating with others - the Assembly Point will have a fire-earth fixation.</p> <p>The Assembly Point determines the consciousness setting. Therefore, if you practice magic exercises on the element of air, there will be a shift of the Assembly Point to the area of air.</p> <p>Psychological complexes and preferences are not related to the displacement of the position of the Assembly Point by elements.</p> <p>Most people have a centered position of the Assembly Point. But the Assembly Point is shifting all the time. We note and record the position of the Assembly Point at the time of testing. <i>/ Detailed explanation - in the Appendix to the Magic Personality Map.</i></p>

2. Diagnostics of mental accumulation on the chakras

This is an indicator of development - it reflects how much information you have accumulated on past lives on the level of the chakras. Prescribed mental mass on the chakras is your unique information, personal experience in solving some issues, tasks, problems.

This information is very slowly accumulating from one incarnation to another, as most of the tasks that we solve in life are quite typical.

Mental accumulation on the chakras ("chakras firmware")	Muladhara: 2 units. Svadhithana: 3 units. Lower Dian Tian (just below the navel): 3 units. Manipura, Solar Plexus: 3 units. Anahata: 1 units. Vishuddha (1/2/3 body): 0 units / 0 units / 0 units. Ajna (1/2/3 body): 0 units / - units.
---	---

On average, people of 3-4 castes have accumulation on the chakras of 3-4 units.

Mental accumulations in terms of Vishudhi and higher are very rare.

If the mental mass on the chakras is more than 6 units, this indicates a fairly high level of accumulation.

Details: <http://ezohata.com/node/post/592>

“Accelerated Development” Technology is aimed at finding sources of mental, new information, algorithms of successful behavior in business, healing, love, etc.

Our Center specializes in the study of ancient and modern technologies that can enhance the mental mass, the subconscious experience of the individual.

We will talk about them further.

Note 1:

The mental accumulation on the chakras shows the overall experience of development, it helps in the evolutionary process, but this does not directly indicate professional effectiveness.

For success in specific issues, you must first accumulate **professional information**.

Note 2:

The mental on the chakras does not reflect the activity of the chakras - it shows the level of accumulation of experience for each level. The mental on the chakras is rapidly accumulating, to engage in technologies of accelerated development.

The high rates of mental accumulation and the low position of the Assembly Point mean that there can be damages in the energy sector, magic strikes associated with lowering the Assemblage Point.

High rates of mental outflow (over 40%) due to past livestock catastrophes also lead to a decline in the position of the Assembly Point.

Indicators of mental outflow are tested further in the Magic Map.

6. POPULAR EARTH TECHNOLOGIES OF ACCELERATED DEVELOPMENT: Magical Dedications that you have had before.

Magic egregors are often egregors that contain a huge amount of information. Their peculiarity is that they contain unique information on accelerated development, training of psychic abilities, prediction, energy healing, work with egregors, the study of spirits and plans of realities.

Inclusions in magic egregors are a unique source of information on the structure of the world, accelerated development and development of magical and healing abilities.

When initiating to an egregor, information from the egregor begins to flow to you, which turns into your subconscious experience and understanding in the areas of specialization of the egregor.

Note: Extraterrestrial Dedications contain valuable experience and knowledge that come from the professional egregor of the Ancient Highly Developed Civilizations.
More information: <http://ezohata.com/catalog/details/313>

Note 1:

All Dedications can be divided into 4 types:

- 1) There are Dedications that carry the energy of attractiveness:
Dedications of female and male attractiveness (Aphrodite, Apollo).
- 2) There are business dedications (Hermes, Plutos, Billionaires)
- 3) Magic and healing dedications are also distinguished (Toth, Asclepius).
- 4) And also motivational Dedications are distinguished.
For example, Dedications to sports and healthy lifestyles (tested in the Habit Map).

Note 2:

Any Dedications - a permanent information download channel (Development Channel).
Usually people have 2-3 remaining Dedications.
More than 3 Dedications are quite a lot, it says about active participation in ancient cults.
Professional Magic Dedications are quite rare.

Signal Strength from Preserved Ancient Dedications
at the level of 1 unit and above is now quite rare.

Note 3:

There are several dedications in each incarnation.

Dedications could be earlier; there could be more, not only these.
But we can test only those that survived at the moment.

The fact that we write "Not visible" does not mean that there were no dedications - this means that now there is no survival on the energy structure of the inclusions residues.

Part 2. Experience in technologies that accelerate development.

9. Ritual "DEDICATION THROUGH DEATH."

The key ancient earth technology of accelerated development.

Essence of technology -

combining the adept with the experience of his past incarnations in a situation of tremendous stress and activating his accumulated past experience.

Technologies of this ritual were present before:

- **In the Egyptian civilization 3-4 thousand years ago**
In Egypt, it was a very difficult manipulation with heavy recovery period of 1 year.
In Egypt, only Dedication per incarnation was made.
- **The ritual of the Dead - Tibet**
- **The ritual of Death and Rebirth - was held at the Masons, 200-300 years ago -**
- **Dedication through Death in the secondary cities of Atlantis 20-30 thousand years ago**
(ancient culture which used Atlantean technology)

Experience in Ritual through Death:	Experience of participating in Ritual Dedication through Death - tested in the Express Development Map
-------------------------------------	---

NOTE: Dedication through Death.

Dedication through Death -

one of the key, legendary technologies of human development in pastatlantic period.

The fact that you have traces of the Egyptian Dedication through Death suggests that you were involved in Egyptian magical culture in the past.

Dedication through Death gives a powerful impetus to development.

People who have passed this dedication are usually more developed than those around them.

It is a launching pad for personal development and other more complex technologies that have been used in other space civilizations (for example, Monad Experience, Mental Restoration).

Dedication through Death -

legendary technology in both Tibetan magic and Toltec magic (described by Castaneda)

and was one of the key technologies of development in the magical culture of Egypt.

Dedication through Death is a very important technology and we recommend to begin with it as a first step among the technologies of accelerated development.

TECHNOLOGIES OF EVOLUTION

NOTE: Technologies of Dedication through Death.

All technologies of Dedication through Death were conducted by different principles.

For example, Egyptian Dedications through Death were the most dangerous and most productive. In Egypt, these technologies had a mortality rate of 1-2%, which is a very serious level.

- What about the Toltec Dedications?

“The peculiarity of the Toltec Dedication Through Death technology was that there was a very tough selection of people who were allowed to follow these traditions, and individual work was carried out with each of them.

In the Egyptian tradition - it was a mass system of Dedications. Religion and magic were part of the state apparatus and everyone who participated in these school systems passed through this system regardless of their level of development or state of health. The dedication was carried out with tremendous power, because every 50th could not withstand the burden of these dedications.

In other cultures, mortality rate was almost zero, because it was not possible to maximize the use of experience and information from past incarnations.

In different cultures, this amount of information ranges from 3-10%.

The most qualitative, then it was the Egyptian and Toltec technologies of Dedication through Death.

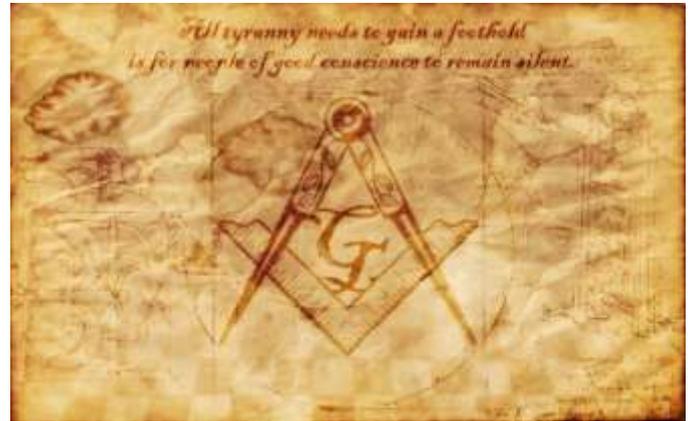

As a trigger, a variety of technologies are used in these cultures.

For example, in Masonic cultures a resonance is used with the experience of dying, which was in humans in various incarnations in the past and resonance with the egregor of burial in principle. The Tibetan technology uses the souls of dead people in the worlds of death to activate the ritual. In the Toltec tradition, the Consciousness of the Channel of Death lures and draws attention in different ways.

Different cultures, different ways - the result is the same: an attempt to merge the personalities of the Earth Incarnations into a single system. Then, on the one hand, information from past incarnations is poured, on the other hand, elements of collective consciousness appear, which increases the person's inner experience.

Technology of Dedication through Death, which was made earlier, gave impetus to the current moment.

Unlike the Egyptian Ritual through Death, the experience of participating in a group of these rituals is much less common.

But these rituals are very important, as they involve other additional layers of past experience. And we recommend installing them after the “Dedication through Death” Ritual.

TECHNOLOGIES OF EVOLUTION

PART 3. Atlantic and Extraterrestrial technologies of accelerated development.

12. "MENTAL RECOVERY" technology:

As a result of man-made disasters in past highly developed civilizations, gaps of higher subtle bodies (gaps of mental bodies) could occur.

Such damage leads to the loss and blocking of the experience that you have accumulated in past incarnations, as well as they affect the energy health, the integrity of the organs and body systems.

Recovery of mental bodies - valuable technology to restore the integrity, health of the body and increase the level of consciousness in general.

Its indirect effect is an increase in mental mass and a natural increase in the position of the Assembly Point.

<p>Restoring of mental traumas</p> <p>Mental recovery</p>	<p>Mental outflow: 40%.</p> <p>If the mental outflow is 30% and above - it is considered too much. / Average of mankind mental outflow is 30%</p>
---	--

Mental traumas are mainly associated with participation in yin-cults. As well as the ancient cataclysms, military operations, magical clashes. Due to the mental outflow, the experience gained earlier may now be partially unavailable.

Mental traumas can be removed, which will improve access to the accumulated experience and increase the power of consciousness.

Mental recovery along with the Dedication through Death is one of the first technologies that people start with who are interested in their development.

According to reviews **Mental recovery** usually has a good effect on overall well-being.

TECHNOLOGIES OF EVOLUTION

13. "THE MONAD EXPERIENCE" technology:

This is one of the most powerful technologies of accelerated development, as it provides access to experience and knowledge that has accumulated not only on Earth, but also in different ancient civilizations of the galaxy during the entire period of evolution.

The main value of the Monad Experience: increase of wisdom

inner experience and knowledge when the person has concentrated experience of thousands of incarnations.

<p>"Monad Experience" 1 level</p> <p>Access to experience of all previous incarnations.</p> <p>The level of the signal of previous incarnations.</p>	<p>Has the technology Monad Experience been applied to you – not visible</p> <p>Engaging the experience of past incarnations (Monad experience):</p> <p>Body consciousness - 0% The consciousness of the person - 0% Supraconscious level - 0%</p> <p>On average for humanity - a signal of 0% for all levels. This parameter shows how active the experience of past incarnations is in your current personality, how much access to the experience of past incarnations takes place directly.</p>
<p>"Monad Experience" 2 level</p> <p>Parallel realities</p>	<p>Has the technology Monad Experience been applied to you, 2 level - not visible</p> <p>This technology is very rare.</p>

The active Monad Experience is very rare.
 Always having an open Monad Experience - this is the result of the technical optimization of the work of consciousness in highly developed civilizations. This means that your mental mind was specially worked in ancient extraterrestrial civilizations. This technology was not used by terrestrial civilizations.

TECHNOLOGIES OF EVOLUTION

14. "Saving of the Personality" technology

This is the technology of Continuous Consciousness.

When using this technology, one and the same (your current personality) begins to materialize, which allows one to realize oneself from life to life and to develop rapidly.

- **Dedication of Preserving the personality of the Atlantic period – was applied**

Now - not preserved.

Only those people remained on the Earth who did not have these Dedications or they are not in working condition.

- **Dedication of Preserving the personality of Extraterrestrial civilizations – was applied**

NOTE: What is the value of this technology?

First of all, this is the process of **rapid development that we are launching**.

Imagine that a person incarnates - finishes first class - and dies. And in the next incarnation in the same way. We get thousands of personalities with the consciousness and experience of a first grader.

When we launch the Dedication of Preserving the Personality and form Continuous Consciousness, we have the same person that finished first class, in the next life she develops further and finished second class, third, tenth, went to university, graduated from academy, became an outstanding professor - and it's all the same person.

Instead of thousands of first-graders, for hundreds of thousands of years we get one huge personality of a very experienced academician. These technologies lead to vertical development.

We get one big personality that is evolving rapidly. All those who have preserved the model of Continuous Consciousness from the time of Atlantis, have already ascended into the Divine worlds.

15. "STRAW BRAINS" technology

Among the key technologies to increase the power of consciousness are:

- Synchronization of the hemispheres of the brain

- Plane of Thinking (enhancing analytical skills) and
- Straw brains.

Technology of Plane of Thinking and Synchronization of the Hemispheres improve the system that you have. These are technologies for optimizing your own consciousness. These parameters are tested in the Energy Map of the Personality: <https://ezohata.com/catalog/details/83>.

Technology "Straw Brains" increases the power of thinking several times, not by some percentage. Technology of "Straw Brains" is a technology of Star civilizations that increases the power of the brain on average five times.

Presence of the Straw Brains Program installed earlier:

18. Internal Noise.

Internal dialogue leads to the expenditure of mental energy. In Toltec magical practices, great attention is paid to achieving inner silence, which leads to the accumulation of personal power and magical abilities.

1	Value of the internal noise	7 units
---	-----------------------------	---------

Stopping the internal dialogue is a basic necessity for the formation of a magical consciousness, because a lot of time is spent on the internal dialogue and the internal dialogue fixes the world in a non-magical state.

We clear the region of the inner self and remove Dedications and stresses, that foster internal dialogue.

The level of "internal noise" in people can reach from 1 to 10 units. On average, people have an "internal noise" level of 4-5 units.

We can help to stop the internal dialogue /Internal silence/.

1 cycle adjusts the parameter data by 2 units.

Details: <http://ezohata.com/catalog/details/317>

FEEDBACK: Earlier, I tried to train on my own to turn off the internal dialogue (yoga, meditation, etc.). The air was silent for 15-30 minutes during the practice. 3 months later I was done this service and I was surprised to notice that I can be internally silent and it does not bother me - the state of self-fulfillment. <p>Kundalini Activity This flow of energy and information from the generic structure of the forces, which are included in the generic structure.</p>	<p>Kundalini 1 The energy and information that goes to you through the Kundalini channel: 1st level - 0% signal 2nd level - 0% signal 3rd level - 0% signal 4th level - 0% signal 5th level - 0% signal The norm in humans is 0%. It is very rare. If there is a Kundalini signal of 5-10%, it means that accelerated development technologies were applied to you in highly developed civilizations. <p>Kundalini External (Level 2)</p>	<p>Inclusion of Kundalini in External Flows - 10%. Details: http://ezohata.com/catalog/details/256</p>

QUESTION: How can it be that Kundalini of Level 1 does not work, and of Level 2 works?

ANSWER: Kundalini - the energy flow that goes into the structure of the genus.

There are two parameters: how this flow goes to you (Kundalini of Level 1) and the second is how this flow goes to the Generic structures (Kundalini of Level 2).

Most often, Kundalini of Level 1 is completely clogged. Level 2 Kundalini almost always functions. Generic structure at least a little, but is included in this flow.

Details: <https://ezohata.com/catalog/details/102>

Generic Experience, Kundalini Channels - all these are additional sources of information. When clearing communication with the Generic Experience, it is felt in reviews that there is some new information in the energy structure.

Note. When testing you need to take into account that, most likely, there may be mistakes.

This is due to the fact that, firstly, it is a difficult meditative work. Contact with past takes a lot of energy. These personalities have a weak energy potential, are strongly displaced into the world of the dead personalities, therefore it is rather difficult to see your own past incarnations.

Often, viewing your incarnations turns into an essay on the topic "Whatever I would like to be in my past life."

Secondly, with a large number of mental injuries and strong outflows of energy (energy damage), past incarnations can also be viewed more difficult.

Therefore, when testing there may be mistakes, but we try to do the work qualitatively.

ANALYSIS OF MAGIC PERSONALITY MAP

ATTACHMENT FOR THOSE WHO ORDERED DIAGNOSTICS
"MAGIC PERSONALITY MAP"

DEVELOPMENT RECOMMENDATIONS:

- The process of evolution is associated with the constant collection and the accumulation of new information.
- You make your own development plan based on your free will.
- Based on the analysis of your personal experience over the course of evolution, it is possible to identify areas where you will succeed a little faster and better.

STEP 1: Analysis of vocational guidance.

1. To select the main activity, it is recommended to pay attention to the areas of your **professional experience - mental accumulation** over the period of evolution. This experience was close to you in personality structure.

In most cases, you will have an activity that is related to the one that you did earlier in developed civilizations.

2. The second factor for the analysis is the **ancient educational programs** established by you in highly developed Civilizations. These programs show what information and expert systems are already at the level of your subconscious. These systems may not work fully, but they reflect the basic inclinations of your consciousness. Often, education overlaps with professional experience.

3. Additionally, notice whether you have magical or healing experience in highly developed civilizations. It is blocked as a result of past catastrophes and magical influences. Often, this situation at the same time causes craving for similar areas, but extreme caution in this area.

TECHNOLOGIES OF EVOLUTION

According to the results of this analysis, most people can be attributed to the groups:

- 1) Professional managers, businessmen.
- 2) Technicians, specialists in information technology.
- 3) Doctors, healers, magicians, scientists
- 4) Military men, politicians.

You can maximize your potential.

Plus, you can continue to develop in any areas of interest.

Development in alternative directions may take a little longer than following the experience that you already have.

The **“mental outflow”** parameter shows what percentage of experience has been lost.

The **“Monad Experience”** parameter shows how far your experience comes from past incarnations.

EXAMPLES OF ACCUMULATED PROFESSIONAL EXPERIENCE

QUESTION: What is the scale of professional experience for the period of evolution, which is measured in the magical map of the personality?

ANSWER: The maximum value is difficult to define.

We can give examples of accumulated experience over the period of evolution among famous people:

George Soros

- Business - 15 units.
- Finance - 50 units.

Bill Gates

- Management - 50 units.

TECHNOLOGIES OF EVOLUTION

Note 1: What are the units of the mental?

If the accumulation of the mental is more than 1 unit, then this sphere has periodically been encountered as a profession.

Some people have a narrow focus of activity, someone are more broadly focused.

If the experience is of 5 units and more - it means that a person enthusiastically engaged in this area. This is quite rare.

Over 10 units of professional experience is extremely rare.

The accumulation of mental is influenced by two main factors:

- the duration of the evolutionary process (when the Monad appeared);
- dedication process (motivation).

Note 2: The experience can be present, and the motivation and desire are not there.

Often when a person is engaged in professional activities, there can be envy and magical influences aimed at this activity. And it can affect motivation.

And vice versa, a person may have a desire, an interest in doing something, but a person has previously been engaged in this. There was no opportunity. And in those and other cases you can help.

A. *If there is a great experience, but there is no desire to do it -*
it means, most likely, that your **motivation is blocked** (by stresses, external influence).
This can be adjusted.

B. *If there is interest in this area, but little experience -*
we can **record professional information** in this area.
This will increase the inner subconscious experience.

NOTE 3. How to accumulate the mental in these fields?

The mental in these directions is gained in the course of evolution through professional experience. But the experience can be quickly recorded. For this the following technology is used:

-  **Specialist lesson** <https://ezohata.com/catalog/details/64>
- **Portion of professional information** <https://ezohata.com/catalog/details/302>
 - **Dedications** into professional egregors (business, healing)
 - Connecting **Mentors**
 - You can also use thematic **Mandalas of the center**.

TECHNOLOGIES OF EVOLUTION

STEP 2: Analysis of inclusions into Gods channels.

INCLUSIONS INTO GODS CHANNELS

The main type of energy that comes from a person and the system of human motivation sets the **inclusion into Gods Egregors**. Descriptions of the main Channels and their qualities are given in detail in the book "Development Magic."

The presence of remnants of Channel Dedications indicates that you have previously participated in these cults. Most likely, you have gained experience in activities in those areas for which these cults are responsible. Your consciousness has accumulated information related to these energies and it may be easier for you to act in those directions that share these egregors.

It may be comfortable for you in this life to associate your activity with the egregors in which you had and have kept the dedication.

In general, egregors can be attributed to the groups:

- egregors of welfare (Hermes, Golden Taurus, etc.)
- egregors of magic (Thoth, Athena, etc.)
- healing aggregates (Asclepius, Druids, etc.)
- egregors of male and female attractiveness (Apollo, Aphrodite, etc.)
- egregors of power and control (Winner, Mountain, etc.)

This information shows your potential, what you have a tendency for, but to follow it or not is up to you. You can set any channels you are interested in.

QUESTION: What does this coefficient, for example, "Remains of Dedication of Horus (0.1 units)" mean? Can you write in detail?

ANSWER: The coefficient is calculated as a part of the initial setting from 0 to 10.

0 - Absence of Dedication

0.5 units - there are traces of Dedication, but not very clear.

1-2 units – basic Dedication. It has a basic steady signal. Gives the owner the appropriate qualities of the egregor, but has a soft effect, without overloading the psyche.

3 units - Good Dedication. The qualities of egregor in the carrier appear more clearly.

More than 3 units - a strong, redundant signal, demolishing everything around.

Dedications of this level are quite rare.

It matters how long a person is ordained and how often the initiator works with the flow, uses it for himself and the situation.

TECHNOLOGIES OF EVOLUTION

NOTE:

The presence of traces of magical dedications suggests that you were participants in these magical traditions.

The value of these dedications is that out of these egregors comes information, experience and knowledge, which is deposited on a subconscious level. This has a significant developmental effect. Development is the accumulation of mental. Magic dedications give mental accumulation in areas of specialization of egregors.

Dedication into professional egregors is one of the most effective developing technologies. Usually, egregors are constantly developing, new information appears gradually and new information flows to the person from egregor.

But this experience is not like the information as in the book. At the logical level, you may not understand. By experience, all these topics are understood on an intuitive level. Words you most likely can not express. But if you come across some kind of technique, it feels like you already knew everything for a long time.

QUESTION: Is it better to restore those Dedications that were present or establish new ones?

ANSWER: Somewhere there is more information, somewhere less. Each Dedication is the experience and knowledge coming from the egregor. Egregors concentrate in themselves the experience and knowledge that are part of this system. We recommend that you choose those egregors that match your interests.

QUESTION: From what Dedications do you recommend to start?

ANSWER: It is recommended to start with those egregors that interest you. For example, you are interested in Runic Magic or Toltec Magic — you can start from dedications in these areas. Or you can start with some large egregor, which contains a lot of information, for example:

- Atlanta Magic egregor:
- Magic of Lemurians:

STEP 3: Analysis of vocational education in postatlantic period

QUESTION: Religious and magical education in postatlantic period in Egypt, 4000 years ago. What was it? What does it give?

ANSWER: This is some kind of experience of learning the principles of magic, religion, working with Deities, etc. It depends on how actively you studied, how actively you were taught, how you practiced. This is some kind of preparation.

This question is similar to the following: I studied math in school. What does it give me?
Any learning gives a certain subconscious experience.

QUESTION: Priestly Incarnations: What Does It Give Me? Did? How to use it?

ANSWER: Dedications, Cults, that we could - described in the Book of Magic Development.
Each cult has certain knowledge.

At that moment, when the Dedications were set, it gave experience and knowledge from this egregor.

And now, after the restoration, Dedications begin to give experience and knowledge from the egregor.

Basically, we set Dedications as a kind of automatic system - developing, giving qualities, experience, knowledge. The dedications themselves pump energy and information all the time, 24 hours a day. But you can actively transfer the flow of Dedications to yourself, pumping energy and information. To just walk and hold this flow. It is possible to work with situations, to transfer a flow on a situation - to address the Deities.

QUESTION: I have the remains of the Druid Dedication. What will the restoration of Dedication give me? Energy of life, health and youth? Healing knowledge? How relevant is this to me?

ANSWER: During the Druid Dedication, the energy of the life force is not felt by the person himself - the energy goes to the assimilation of information from this egregor.

But a person with Dedication transmits a flow of life force to other people in the world around him. The thing is useful. Knowledge of healing, working with herbs is present in the egregor.

Description of the dedications can be found at www.ezohata.com

QUESTION: Knight dedications, Status noble social dedications.

Incarnations in rich families - What does each of them give? How to use it?

We say it was present. But this egregors are not very strong. At the moment when these egregors existed - there was an information exchange between people involved in this process.

But now most of them are no longer preserved. If these egregors were preserved in good condition, they would give the knowledge and experience of those egregors. There are few such egregors.

TECHNOLOGIES OF EVOLUTION

In particular, **the Dedication of the Winner** is one of the powerful knight egregors.

QUESTION: Where and when did the Earth meet a high-quality professional healing and magical education in the postatlantic period?

ANSWER: High-quality professional education on Earth in the postatlantic period was quite rare.

In the postatlantic period, occasionally there were remnants of civilization - "Forbidden Cities". These are the cities which tried to revive the professional Atlantic education.

Some people managed to undergo training in magic and healing, in a system similar to that used in the period of developed civilizations.

These centers existed tens of thousands of years ago. But in view of the fact that the population of the Earth at that time was not numerous, a rather small number of people went through them.

In ancient times, the professional training of magic and healing was rarely encountered. But from time to time there were Training Centers that provided high-quality training.

Among the latter, there are several main training centers:

- in Egypt (about 3-3.5 thousand years ago)
- in India (4-5 thousand years ago)
- in Tibet (2-4 thousand years ago).

In Egypt: work with Deities, spirits, healing basics, shamanic practices, work with the arkans of the Tarot, etc.

In India and Tibet: working with herbs, chemicals, working with spirits, healing.

TECHNOLOGIES OF EVOLUTION

STEP 4: Analysis of the energy potentials of the personality.

1. The position of the Assembly Point -

shows the current level (frequency) of consciousness and the upper limit of the mental. The position of the Assembly Point at the Anahata level indicates a fairly high level of development at the moment.

It should be noted that the basic position of the Assembly Point is even higher. If you return the lost mentality through the mental recovery procedure, the level of your consciousness will increase.

The shift of the elements

The elemental shift shows the basic setting for a person of his consciousness.

The classic is setting of earth-fire, human centering in the present tense.

It is also possible to shift the consciousness more into the past (water) or the future (air).

In magic, the elements show the attunement of consciousness to four different aspects of the phenomena of the world:

- Fire - the amount of energy, amplitude signals of this world.
- Earth - signal structure like that of a crystal.
- Air - multivariate, a shift of consciousness into the future.
- Water - the shift of the energy structure in the past, time.

To tune the consciousness to these elements use:

- Burning fire as tuning to a high-amplitude process.
- Crystals - to adjust to the structure of this world.
- Wind - as a process where there are no stable links and multivariance is present.
- Water for a shift in time to the past.

If a person is slow, it can speak about the character trait and does not always indicate a shift into the past.

Shifts in the elements begin to manifest themselves when the consciousness (position of the assembly point) is displaced above the level of Anahata, which indicates that some human magic has already been developed. This information can be useful for self-determination - what can we expect from ourselves, what are the characteristics of our consciousness?

FREQUENTLY ASKED QUESTIONS

QUESTION: In my Magic Map of the Personality it is written: I appeared on Earth 80,000 years ago. And what was before?

ANSWER: On average, a person's monad develops over several million years. There are several waves of the origin of Souls in the universe.

During its evolution, the Human Consciousness (Monad) passes development in different civilizations on different star systems.

In general, the development of all humanoid Civilizations is similar in all systems.

Similar educational programs in management, magic, technology, medicine, etc. are found in many civilizations.

The average time of existence of different civilizations in Cosmos is several hundred thousand years, after which sometimes cataclysms of different types occur and the Soul develops in other systems. 20% of souls that are now on Earth are over 200,000 years old, the remaining 80% are those that have appeared in the last 200,000 years.

Before this, Souls were developing on other planets, in other star systems.

Prior to this, people were developing earlier in other extraterrestrial civilizations.

Profession, type of activity is often similar in people from incarnation to incarnation. If the "Monad Experience" (the experience of past incarnations) is manifested, the person quickly succeeds in his work. If not manifested, it often starts from scratch.

A person develops by absorbing information from the surrounding world.

Every second we see something, hear something, realize something.

You can speed up development by working with egregors (religious, professional, magical: Runes, Tarot).

We offer to use the "Monad Experience", "Restoration of the Mental" technologies, Dedication into the Gods Channels, Dedication of Meeting with death, and more.

The development technologies that we offer in a couple of years allow us to make a leap in development, which is equal to the development over several hundred incarnations.

Analysis of professional mental / experience

QUESTION: The biggest numbers - what to do with them?

I have the biggest numbers, it is in Studying and Work with computers:

Does this mean that it is logical to make them the key focuses in development?

Then it makes no sense to focus on the rest?

TECHNOLOGIES OF EVOLUTION

ANSWER: Where there are high rates of mental - it was one of the key directions of development of your evolution. But usually it is worth doing what is interesting for you.

You can even do something new, what you haven't done before.

Although professional success is easier to achieve where there is already a subconscious experience.

QUESTION: Parameter of Studying / interest to study, frequency /: 10 units.

Is this knowledge or motivation? What is it? About what?

10 units - this is the highest figure for me - is this manifested in this incarnation, or was it so long over the continuation of many incarnations?

What does it give, what to do with it?

ANSWER: It means that you studied a lot. This manifested itself throughout many incarnations. We here consider experience in general throughout evolution, for millions of years. At the expense of motivation is difficult to say. It only says that you studied a lot. And for what reasons - there can be many different reasons. Motivation can be one of the reasons. Or maybe in civilizations there was a compulsory higher education. Or maybe parents forced you.

Here the mental is taken into account in relation to school education, higher and special. The mental in this area speaks about the amount of general educational information accumulated and some other special information.

QUESTION: Hobbies, experience: I have experience in sports, theater, etc .

Doesn't it go as a profession? Why?

ANSWER: If you have experience in theater, sports, then you have been doing this for a long time. This may be a profession and hobbies. And sometimes it can be combined or manifest some different aspects of this experience in different lives.

QUESTION: I have 5 mental units in my Magic map, and how much will it be after the Monad Experience? What do I get this way? Without the Monad Experience, would this cleaning be possible?

ANSWER: Without the Monad Experience, knowledge of past incarnations practically does not reach here. Everything that was before is blocked by a person. The Monad Experience and the Dedication through Death begin to use this experience.

You can start by setting the General Experience of the Monad, and then clear the Local ME in the direction you want. Experience will begin to flow. The amount of accumulated mental does not change. It simply involves the experience that was present before.

QUESTION: Are the parameters of the accumulated professional mental associated with Dedication through Death and the Monad Experience?

ANSWER: In the Magic Map, we are testing the total accumulation of mental during evolution, which is not related to the experience technologies of the Monad or Dedication through Death.

TECHNOLOGIES OF EVOLUTION

These technologies only organize the process so that this mental will quickly manifest in the individual.

QUESTION: It is indicated in my map that the magical and healing experience are at the remote distance, 600-700 000 years ago.

**Was it in other civilizations? On other planets? Is it generally relevant for the Earth?
Is it worth doing magical healing? Will there be success?**

ANSWER: Certainly, this experience has been gained in other civilizations, not even closest. This is a remote experience, because it can be traced only with in-depth research.

Now there are few schools that give powerful knowledge of magic and healing.

If to show the knowledge accumulated earlier it will certainly be useful.

In any case, we are talking about the same humanoid civilizations. The same laws of physics. For the manifestation of past knowledge, you can do the experience of the Monad. Knowledge will come to the surface, but the timing of when it happens and at what speed is difficult to predict. Past information begins to vaguely manifest itself as a kind of internal experience, but it is a long process. Moreover, it is a remote experience. Until the remote experience reaches, it takes more time than the experience from the closest incarnations.

QUESTION: If the experience is of 10 units and more - it means that a person is enthusiastically engaged in this area.

ANSWER: Yes. Often this is due to the fact that a person likes to do it and he gained high experience in this field.

QUESTION: How can you comment on my mental numbers in professional experience? Something for me to understand what it means. How good / bad is that, what should be considered, etc.

ANSWER: If the numbers of the mental are more than 1-2 units, then this indicates the presence of sufficiently high experience.

Experience in the field of business and technology - this is exactly what is now in demand in our civilization.

Although there is experience that is still weakly in demand in our civilization, such as magic.

TECHNOLOGIES OF EVOLUTION

TOPIC: Assembly Point and Recovery of the mental

Question: What is the Assembly Point?

ANSWER: The Assembly Point (AP) is the organ responsible for mastering new information. It follows the attention of the person. The information acquired by a person forms his mental body (subconscious experience). The position of the Assembly Point conditionally reflects the amount of information already accumulated and assimilated by man during evolution (millions of years). The position of the AP at the level of Anahata indicates a decent level of development, a high level of accumulated mental. The position of the AP at the level of Anahata and above corresponds to the Brahmin caste in the Hindu tradition. During evolution, a person accumulates mental injuries that lead to an outflow of accumulated information (mental), which leads to a decrease in the position of the Assembly Point.

Mental injuries can be removed, which increases a person's overall mental mass and leads to an increase in the position of the Assembly Point.

Question: Do Monad Experience, Mental Recovery technologies affect the position of the Assembly Point?

ANSWER: Primarily the position of the Assembly Point (the total number of a person's mental) is influenced by the technology of Mental Recovery. It allows you to usually raise the level of the Assembly Point to the floor one level. Other technologies of accelerated development (Monad Experience, Dedication through Death, etc.) also increase the mental mass, affect the position of the Assembly Point, but do not act so brightly.

Technology of Mental Recovery increases the total number of mental person in general.

The Monad Experience, Dedication through Death increases mental (experience and knowledge) just for a particular current person.

QUESTION: The mental outflow is 50% (quite a lot). What does it mean?

ANSWER: During his development, a person from life to life as a sponge absorbs and accumulates information (studied information, qualities, life experience, etc.).

Collected and processed information, assimilated, accumulates at the level of high-frequency human bodies (from Anahata and above) and is saved from incarnation to incarnation as a kind of subconscious experience, the power of the subconscious.

Sometimes this experience is manifested in the form of intuition and making the right decisions in stressful situations, when the unblocking and amplification of the signal to the person from the subconscious takes place.

The amount of information accumulated by a person over the entire time of evolution determines the level of human development. The level of development is determined by the position of the Assembly Point of the person (the direction of consciousness).

TECHNOLOGIES OF EVOLUTION

This accumulated subconscious experience of a person ("mental") is damaged periodically ("mental injury").

Injuries are most often associated with participation in the Ancient Yin-cults (outflow of the mental body in the Yin-region of the Universe), as well as with special high-tech damage to the energy sector — body breaks with powerful weapons (for example, nuclear weapons), technical impact and etc.

Such damage occurs periodically in the process of evolution.

Most often this is due to the stages of high development of civilizations, man-made wars and other critical situations many thousands, millions of years ago.

One way or another, almost every person during his evolution in the Universe went through certain periods with severe mental injuries.

Mental traumas rupture the mental bodies of a person and lead to an outflow of the mental accumulated by a person - a decrease in the level of human consciousness.

The level of trauma of subtle mental bodies is often associated with human involvement in various highly technical military campaigns.

On average, a person may experience a mental outflow of 40% (decrease in the power of consciousness, personal potentials by 40%).

For those who avoided hostilities - the percentage of mental outflow is on average 30%. But there is also damage to the mental body up to 70%.

During the procedure of the Mental Recovery, the return of the mental, human experience gradually occurs. The position of a person's assembly point increases by at least one level, the mental mass and strength of a person's personality increase.

This is sufficient from the standpoint of accelerating human evolution.

Your experience, which has accumulated over millions of years, returns.

QUESTION: When was the period of massive Yin Initiations on Earth?

These initiations appear periodically on Earth.

The last small period was 200-300 years ago.

The mass period was about 5,000 years ago - so it captured half a continent. There are traces of massive Yin initiations more than 200,000 years ago.

TECHNOLOGIES OF EVOLUTION

The accumulation of the mental on chakras and skills.

QUESTION: I want more influence and power – should it be set as mental according to the level of Manipura or as skills?

ANSWER: Influence and power are more skills.

Manipura does not affect professional skills. Any profession has a volume of knowledge and skills. Power is leaders and managers.

Influence - you need to determine what kind of influence skills you need - hypnotist, teacher, wife, etc. Everyone has their own way of work.

For writing information on chakras, we still have the corresponding mandala. But if you want to set the mental there can be overloads.

What are the indicators of accumulated mental - you decide.

For efficiency in work, it is more necessary to set not the mental, but professional skills.

Setting of mental on charkas is a technology for rapid development in general.

Fast personal development in any direction - and professional success is not the same thing.

The mental in the process of life is absorbed in all the chakras, and not only in terms of the position of the Assembly Point.

For example, in pickup artists, a mental personal has 3 units on svadhithana at AP on a manipura - and an alluvial mental is of 30 units.

They simply know how to be included in the universal human flow on svadhithana. This is also a professional skill.)

To set professional skills you can use:

- professional mandalas or
- Technology of Mental Recording - specialist lesson.

TECHNOLOGIES OF EVOLUTION

TOPIC: The ritual "Dedication through Death" and the Monad Experience technology

Q: After launching Dedication through Death and the Monad Experience, will I have access to my subconscious experience?

Or is this all wrong and you need to clean it separately on purpose?

ANSWER: After the launch of the Monad Experience technology and Dedication through Death there is a constant stream of knowledge and experience from past incarnations to the person. This can manifest itself in a change in personality. Personality is constantly changing under the influence of knowledge and experience. And the further, the more. Gradually, what was in the subconscious mind will begin to influence. The Monad Experience, Dedication through Death is a long procedure. It will manifest itself over the years - until the information reaches and is learned. And this is despite the fact that we are helping to absorb energy.

But you can still purposefully clear the experience you need: to make the Local Monad Experience, clear the specific signal associated with business or magic.

QUESTION: If I have already passed the Dedication through Death, do I need to repeat it again?

ANSWER: Past dedication - there was an impulse of development for that person who was embodied in Egypt. And she raised the level in subsequent personalities. And each new Dedication through Death for subsequent personalities raises your level one step up.

If there is an opportunity to receive Dedication through Death - this is a very significant moment in development.

In ancient earthly magical technologies, **Dedication through Death** was a legend and the pinnacle of magical technologies.

PROFESSIONAL SPECIALIZATION IN MAGIC

MAGIC OF DEVELOPMENT.

QUESTION: My magic map contains my magical specialization - Magic of Development. What is it like? What is this magic based on? How can this kind of magic manifest itself in specialization? And how is this direction best applied?

ANSWER: Magic of development is the study and use of accelerated development technologies.

This is mainly due to the technology of vertical evolution: methods of accelerated accumulation of mental mass, cleaning of mental injuries, etc.

If we draw an analogy with the school, the technology of evolution is the technology of how to learn quickly.

Since in the past you already had experience in the field of Magic of Development, these technologies will be given to you faster.

The technologies of accelerated development that we use are Dedication through Death, Monad Experience, Optimization of the Assembly Point, Mental Recovery, Downloading Information, etc. - these are all technologies of accelerated development.

One of the popular technologies of accelerated development, which you can use yourself for writing the Anahata chakra, is "Christian love".

Details: <http://ezohata.com/node/post/598>

It is also possible to use the technology "Complete merger with the Arkans of the Tree of Sephiroth - Tarot" or any other sources of information.

Magic of development and Siddhi.

Development magic is not usually associated with siddhas. Siddhi is considered or as a side effect of accelerated development. If the siddhas are trained specifically, then these practices are not related to the **Magic of vertical development**, but to the **Magic of horizontal development** (accumulation of potential at some level, accumulation of power).

For example, personal professionalism refers to the issues of horizontal development.

Vertical and horizontal development.

Vertical development is technology how to finish school faster, go through all the subjects faster. Horizontal development is when a person tries to study a subject well. These tasks may conflict with each other. If the task is to quickly finish school, then the person may not know the subjects deeply.

TECHNOLOGIES OF EVOLUTION

The faster we move vertically, the worse horizontal stripes are. In this case, adhere to the "principle of sufficiency": how much you need to know to go to the next levels.

Someone likes something one more something else. The number of levels is almost endless.

Topic: TAROT AND MAGIC OF THE ELEMENTS.

QUESTION: The elemental magic was indicated in my magic map as one of the specializations. What is this magic based on? On small arkan? Or then there were other processes? How does this kind of magic manifest itself in specialization? How can this direction be used?

ANSWER: You can practice elemental magic. This is a separate direction in magic. It contains a wealth of information. This is professional information. Small Arkans of the Tarot cards simply describe the technology of working with the elements. The minor arkans of the Tarot are encrypted alchemical texts describing the practices of working with the elements. But this is only one of the approaches to working with elemental magic. This is one of many texts descriptions.

QUESTION: Were the systems of the Tree of Sephiroth different on Planet Earth? Will experience with the elements in different civilizations relate to different Sephiroth Trees?

ANSWER: Small arkans do not belong in the Sephiroth Tree. The Tree of the Sephiroth includes the Great Arkans of the Tarot.

In those civilizations where there is magic - there is also the magic of the elements, as one of the areas of work with magic. The magic of the elements was in Atlantis, and in Lemuria, and on other planets.

The Magic of Elements is the physical characteristics of a given world (amount of energy, structuring, chaos properties, temporal processes, etc.). The magic of the elements are still the magic of life and death.

We have a series of Mandalas on Magic elements:

Setting on the Planetary egregor of Elemental Magic, Magic of Life, Death Magic.

More information in the section: [Magic Mandalas:](#)

These mandalas are used mainly as a source of information on these topics. Learning while we are not engaged. Basically, the technology of work through Mandalas is closer to the classical library technologies adopted in developed civilizations of the Galaxy. A person contacts the Library and downloads information on the topic of interest. In parallel, he works with experienced Mentors and specialists. The mandalas that we created were primarily created to download information.

VOCATIONAL EDUCATION IN DEVELOPED CIVILIZATIONS

Professional educational programs

QUESTION: magical, healing, etc. education in Atlantis received a fairly large number of people. Is it possible to directly draw an analogy between their realized professional success with the professional programs established at the time of Atlantis?

ANSWER: Vocational education itself, as in our world, does not guarantee success.

If people ask whether a person will be successful in this life - depends on what kind of specialist he was before, what is person's professional experience in the past and whether his Monad Experience (experience of past incarnations) reaches him.

By indirect levels, you can draw an analogy. For example, business education earlier in civilizations was most often put to those who for several hundred thousand incarnations specialize in business, who like this area. As well as healing and magical educational systems.

Often, one or more areas of professional activity can be identified in people for tens, hundreds of thousands of years. Sometimes this direction changes, but more often shifts are associated only with critical events, disasters or bursts of technologies of accelerated development.

However, long work in one direction does not always guarantee high efficiency. Professionals in the field of magic, business often were products of entire civilizations and have been preparing for millions of years.

Sometimes there are educational systems of the second, less often the third level. In order to patch these programs, a person must be a second-third level magician respectively (an Assembly Point on Vishudd and above and in the presence of extensive professional experience in magic).

To get a good education, you need to be smart enough person.

The rest of the programs of 2-3 levels are quite rare.

Professional educational programs give an expert assessment, additional experience in solving problems, but the person's success is still based on his personal experience as a specialist in solving various tasks.

This experience can be gradually developed through the record on the mental matrix of the professional experience of leading experts in areas of your interest.

Writing professional information gradually increases your subconscious competence and manifests itself in how you solve problems.

The key to success will be - a wide subconscious experience (open personal or set additionally) + your personal practical work in the direction you are interested in. Thus, the subconscious experience gradually turns into the necessary skills for doing things and forms the events you need in life.

The key technologies of evolution that can significantly increase the level of consciousness include:

- **Dedication through Death** (merging of experience in all Earthly incarnations of man)
- **Monad Experience** (clearing experience for all the period of evolution)
- **Mental Recovery** (restoration of the accumulated potential of the individual damage caused by man-made disasters, participation in Yin cults, etc.).

A description of these and other technologies will be cited in the **book "Development Magic."**

SUBJECT: Atlantic Professional Programs

**QUESTION: Are the Atlantic and Lemurian programs active or inactive?
Can they be restored?**

Vocational education programs were not usually restored before, but re-set. Tens of thousands of years have passed. They are very difficult to restore. They still function somehow. But from them usually 0.5-1% remain. Very rarely something works well.

We are restoring now only some programs which were set in the past developed civilizations:

- Energy Transfer Programs and
- Brain Enhancement Programs
- Personal Preservation Programs.

For all our technologies, we give a 100% guaranteed result.

MONAD EXPERIENCE AND AVATARS

QUESTION: What does the flow of the signal of the Monad Experience mean on the level of the bodies of Consciousness, Superconsciousness and Body Consciousness?

ANSWER: The body forms its own consciousness - the total consciousness of all cells (the consciousness of the body). In various magical cultures there are recommendations to communicate with the body, to ask how it feels and what it needs. There are special exercises in which it is the consciousness of the body that is trained, not the personality.

There are descriptions in Castaneda that, at the time of learning, magicians transfer some of the information to the body's consciousness, since it is believed that it learns faster than the personality.

With the Consciousness of the person it is clear - this is who we are aware of.

Superconsciousness - the high-frequency bodies form their own consciousness, separate from the personality, sometimes we say - "Super I".

Please note that in the Magic Map of the personality, we estimate not the manifestation of these bodies, but the exchange of information - experience and knowledge between the bodies. The level of signal flow from the subconscious ("Monad Experience") is diagnosed along these three levels.

Q: WHO ARE AVATARS?

In the process of development, parallel realities are formed, where a person has a different fate. In some variants of reality, a person can reach the Divine level.

Then we will say that this particular person is the Avatar (incarnation) of this Deity (which is in a parallel reality).

As a strong signal comes from the Deity, this signal is felt on the person, it amplifies and develops him. The presence of such divine incarnations in parallel realities speaks of a high level of human development. Information from the Ascended Deity, as well as from other incarnations, is copied to the neighboring branches of reality.

Technology of Monad Experience just helps to clear these branches of reality, to increase the permeability of the signal between parallel incarnations, enhancing the interchange of information and accelerating development.

Monad Experience Technologies of 3 levels allow you to enhance the signal of Avatars (if any).

Although the assimilation and expression of experience takes a long period (more than four years) with regular work with this information and energy injection, this process can be accelerated.

NEXT STEPS. FREQUENTLY ASKED QUESTIONS

QUESTION: What technologies of accelerated development would you recommend in the first place?

ANSWER. In the study of the magicians of a number of highly developed civilizations, in consciousness which was subjected to optimization was discovered that for the development they used first of all the following procedures:

1. Rituals through Death (Dedication through Death, Monad Experience),
2. Mental Recovery
3. Technology of continuous consciousness (Preservation of the personality) and
4. Information download technologies to add new information.

Description of all these technologies - in the Book of Development Magic: ezohata.com/podarok

QUESTION: Where would you recommend to start in the direction of accelerated development?

ANSWER:

Step 1 Dedication through death is important.

This is a legend in the world of magic. In all spiritual traditions, it is somehow mentioned in various modifications.

From our point of view, this is one of the most powerful Dedications. But for the adept it does not give bright sensations. In fact, this is what happened to people who have experienced a deep clinical death. Numerous reviews say that at that moment they did not radically feel anything, but they felt that everything changed dramatically in 3-4-5 years. This is the specifics of this dedication.

It is necessary to take into account that Dedication is weakly perceptible at the moment itself, and it is not clear what happened. People say that something is happening, but they cannot describe it. But after a few years, everyone says that they have changed dramatically.

There are Dedications of beauty - after a week or two, people say that they began to pay attention to them. And they feel the energy. And this is a technology of deep personality change, consciousness. It is felt that something is happening, but it is very difficult to describe it.

TECHNOLOGIES OF EVOLUTION

STEP 2. Second, we recommend that you do Mental Recovery.

Especially the very first cycles have the maximum effect, because the most severe and massive damage to the energy structure is removed. They are most noticeable, because are cleaned in the first place. In subsequent cycles, hundreds and thousands of minor damages are removed. They are the most difficult and there are already less sensations, they are less noticeable. Damage that has accumulated over millions of years of evolution is removed.

Rather rare technology. There are few magical civilizations where this technology is applied.

STEP 3. MONAD EXPERIENCE.

Very rare technology. Among those who have subliminal magical experience, among those who in the past professionally practiced magic and came to us, 70% passed the Dedication through Death in past incarnations.

And the Monad Experience passed only 0.5% of all. Also, only 0.5% of these people underwent Mental Recovery.

We cannot say that this is a legend - because the technology of the Monad Experience was made very rarely in magical civilizations. Among the technologies of accelerated development in efficiency, it is among the top three.

STEP 4. Next in importance - Dedication of preservation of the personality.

This is one of the main technologies of evolution in the Atlantes. It occurs quite often, but in a destroyed state. Those who had it in the whole state, have long since ascended. It gives a powerful impetus to development, but in the future.

Next come the technologies to support the first 4: We recommend starting with the first four. Next come the secondary, but very important technologies.

Other technologies are equally important, but we have described what is desirable for development in the first place.

QUESTION: I want to do healing, help people. What development plan can you suggest?

ANSWER:

1. For a start, you can restore your energy and resources. For this we can recommend the technology:

- Energy cleaning
- Cleaning of complexes
- Mental recovery

2. To speed up your realization, Dedication can be established that introduce you into the world of magic and healing and stimulate interest in magic and healing.

- Dedication of Thoth
- Dedication of Athens
- Dedication of Druids and others.

3. If you have experience in magic and healing in past incarnations, it is recommended to do Dedication through death to activate it.

4. The completeness of your implementation, the number of clients depends on your business skills and organizational skills. To enhance the cash flow and customer relations, we can recommend Mandala of Money No. 1 and Mandala of Money No. 6. When reviewing these mandalas several times throughout the day during the week, they will strengthen your fixation in the cash flow.
