PART 1. ENERGY DAMAGE.

1.1. The energy load on the current life.

Note: the presence of magic strikes is tested in the **Express Development Map**.

Energy damage, magic strikes can be removed, which will significantly improve general well-being.

More information: on request.

In many cases, when particular serious damage and the evil eye are removed during cleansing, there is severe discomfort, vomiting and diarrhea. You need to be ready for this.

You can reduce these states every half hour by meditating on the sun and magma.

In any case, let us know if you have any discomfort and we will try to help you!

Note: magic strokes can also stimulate

- Complexes of desire to brag (see Development Map)
- Complexes of resistance to pressure (see Development Map)
- Dedication that stimulates black magic aggression (see Habits Map)
- Dedication that stimulates assaults, aggression of others (see the Habits Map)

Remember that psychological complexes shape your behavior, and behavior models situations in which you find yourself. They actually simulate your fate.

1.2. The magical load on the Generic system. Generic cleaning.

The problems that accumulate in the Generic structure, Generic curses can affect the health and fate of a person.

PART 2. ENDURANCE, YOUTH AND VITALITY

2.1. Silver Thread Quality - Human Vitality:

This is the basic energy from birth.

Silver Thread Fullness - 0.5 units.

// On average, at birth, the strength of a silver thread is 2 units, a good standard is 4 units

Silver Thread Thickness - Consists of 1 female and 0 male threads.

// good standard: 3 female and 3 male threads

Note 1:

For some reason, over the past two years, the condition of the Silver Thread has plummeted among all people on the Planet. The reason is not entirely clear.

Possibly, the mechanism for adjusting the population has been activated.

In particular, it was noted that epidemics and influenza diseases have increased several times.

Note 2: Silver Thread technology

Level 1- The silver thread is restored in its original form, the lost energy, the structure of the silver thread are returned. The indicator of fullness of energy of the Silver thread returns approximately to the level that was laid by the parents. / 50 ye

Level 2- The natural defects, defects of the silver thread laid by the parents are corrected. The silver thread is strengthened by interweaving reinforced fibers into it (fibers of highly structured energies, which make it possible to hold large loads).Your silver thread is able to withstand bigger loads. / 100 ye

Level 3 - We increase the resilience of the body by adding another male and another female thread (fatherly and maternal), using unrealized emissions of the silver thread of your parents. The destruction of the silver thread caused by the accumulated effects is also removed: By the Waves of Death, which exist in the System and destroy the Silver Thread. / 150 ye

The second and third levels of the Silver Thread significantly increase endurance, vitality.

PROMOTION: If you order all three levels at once, then Discount of 100 ye for the Third level is applied.

FEEDBACK: Restoration of the silver thread / Larisa

As for the silver thread - you need to watch it. But stamina, performance already increased. I saw the Silver thread as if smeared with gray energy (I do not know how much this is true). I learned about you from a friend. I was very pleased, thanks again.

FEEDBACK: Old-age signal cleaning / Nikolai

In general, they have not been diagnosed since the beginning. Although intuitively, I felt that something from the past was extinguishing the organism.

On the day when the work began, there was a state of certain intoxication, euphoria, an increase in tonus, similar to an increase in vital energy. Then the chronic deceases got worse, then began to pass gradually. Appearance - friends and relatives began to notice that I looked 5-10 years younger. Became more relaxed in communication. Internally - I feel like 20 years old, which is very pleasing. In terms of health there is an improvement, the desire to move forward and develop has intensified. The final score of this service. I waited a couple of weeks, and then I wrote this feedback to evaluate the effect. And this effect makes me very happy. Sending kisses, hugs and thank you to center specialists.

FEEDBACK: Old-age signal cleaning / Alice

Today I met a friend who had not seen me for 5-6 weeks, said how freshened up I look, the face is so young, almost childish, the features have changed, as if smoothed out!
(after cleaning the signals of old age, by the way, I more often and often go to the toilet, used to have a tendency to swelling and used laxatives, now I have been dumping accumulated toxins for 2 weeks now).

FEEDBACK: Old-age signal cleaning / Dasha

Regarding the removed signal of old age - like other reviews, I also noticed something difficult to express with words about the condition of the skin of the face, like wrinkles are in place, but it is more pleasant to look at myself in the mirror.

FEEDBACK: Old-age signal cleaning / Alexander

After cleaning the signals of old age there is an interesting sensation of elasticity of the skin, the feeling is similar to the effect of massage, it is especially felt on the face.

FEEDBACK: Old-age signal cleaning / Marina

About the signal of old age: as if I spent 10 days at the resort, generally had a healthy effect on the body, a veil of fatigue fell from my face and I looked 2 years younger.

QUESTION: Tell more about aspects of collision with other people, Old Age Signals?

And if they are cleaned, they do not reappear?

The level of old-age signal processing — does this apply only to signals coming from a past life, or to those that the System sends after a certain age?

ANSWER:

- **Signals of old age from past incarnations** can be cleaned.
It is enough to clean them once. Usually the effect is good, the face is fresh.
The processing of signals of old age affects both the processing of signals from the past life and the signals of old age according to the current life.
- **Meshes with geopathic zones** are removed during the basic cleaning of energy. But a person moves around the city and these parameters gradually accumulate. If there is a high trauma (more than 2 units of load) - this shows that the person had high collisions or the body is slowly recovering. If you stay for a long time in some premises (home, work), you can do energy diagnostics at home and clean the room - this has a positive effect on your general well-being. Sometimes there is even a condition that after deep cleaning you no longer want to leave the house.
2nd level: if you make 3 cycles of cleaning the house and the area around it, in 70% of cases you can make the Portal of Vitality in the house (Sefira Daat manifests itself - activating the intersection point of 17 and 15 of the arkana, their resonance).
- **"Collisions with other people"** indicator -
This parameter shows the load from colliding with other people (conflicts, etc.).
Psychological complexes lead to collisions (resistance to pressure, pressure to push, resistance to impact, etc.) The presence of collisions suggests that it is necessary to clean the complexes that lead to collisions. The presence of these complexes is a common damage factor that significantly affects energy. After cleaning the complexes, meshes with other people will begin to dissolve.

PART 3. HUMAN ENERGY PARAMETERS

3.1. CHAKRA DYNAMICS (percentage of chakra activity):

The dynamics of the chakras show how freely energy flows into the chakra range (there are no mental injuries).

| | <i>Chakras</i> | <i>Dynamics</i> | <i>On average for humanity</i> |
|---|--|-----------------|--------------------------------|
| 7 | Sahasrara (contacts with egregores) | 55% | 50% |
| 6 | Ajna (thought processes) | 60% | 50% |
| 5 | Vishudha (information processing, understanding, integrity of thought forms) | 50% | 50% |
| 4 | Anahata | 25% | 40% |
| 3 | Manipura (vital energy of the body as a whole) | 60% | 55% |
| 2 | Svadhithana (harmonious system, attractiveness, etheric body) | 60% | 50% |
| 1 | Muladhara | 55% | 40% |

Note: Dynamics of chakras shows the presence of blocks on the chakras, mental injuries, various magical effects. The higher the dynamics of the chakras, the better.

It will be possible to diagnose the condition and check the cleaning effect as follows:

the chakra is like an airplane turbine, as far as it works before and after correction.

The values for the chakras can be + -10% depending on the state of the internal and external systems that include people.

FEEDBACK: Irina

After activating the dynamics of Anahata. Perhaps this is exactly what could be called genuine human happiness. Feel people, the world, yourself and your own life. Some problems in communication were decided by themselves, men began to appear, eventually (well, simply because if your heart opens to the world, then the world will gladly respond). My perception of life has always been rational, logical, and now only (after the service) it became clear how poor my emotionality was. Now I feel more involved in the conversation in general, the colors of life have appeared. In general, the activation of Anahata service is very valuable. The initial dynamic was 30%. Anyone who is just as low, I highly recommend.

FEEDBACK: Svetlana

From the intensification of the dynamics of Anahata, the general effect is beautiful. I am very glad that among the many services I have chosen this one now. I'll try to describe it later. Contact with people and with their internal processes has improved markedly. This is a very valuable service!

FEEDBACK: Andrey

Every day everything is gradually leveling, the state of "being high" is increasing)

There is some kind of softness in everything. The gait became soft. The vocal cords relaxed and the voice so far became quiet, unstrained. The state is so good and spiritual. It even feels like the vessels have become cleaner, the eyes have become more relaxed and the head is clearer. It became good, such euphoria. As if life is breathed into me. So easy and positive. Now the Anahata is even better felt. This is of course because I am not used to, then it will probably be equal. Let's see how life will be affected.

QUESTION: About communication channels - are these communication channels about what? About health? About knowledge? And mission and meanings?
ANSWER: Yes, the parameters with which the work is being carried out in the technology Health Standard – Communication with the System are indicated here. All this is there. All that is there is exchanged.

QUESTION: Clearing the canal in the “Health Tuning”
Is it done only at the Planetary level, or immediately both in the Galaxy and in the Universe?
ANSWER: This is in the description of the service. You can do one parameter or all three.

3.3. “Lower connection” - low-frequency discharge of coarse energies.

Low-frequency discharge of heavy, coarse energies. Helps in cleansing and restoring energies.

| Communication with the Ecumenical Money Egregore | Communication - 20% / on average for people of 4th caste Communication with Ecumenical Money Egregore – 20% | |

External sync signal.
These are important parameters. They increase the setting for Money Egregore.

People with wealth have a communication with Money Egregore usually of about 50%.
To strengthen this indicator by 1 cycle is to increase the dynamics of money.

QUESTION: If magic strikes are not visible, why are rates of tuning with money egregore low?
ANSWER: Mental injuries that block tuning, garbage that is present in the channel and many different parameters affect the tuning. Tuning with the Money Channel is a pretty valuable task.
Details about Connection with the Money Channel: ---

You can increase the activity of channels on average up to 90%.

A detailed description of the Channels is in the **POWER CHANNELS** section of the site: -

QUESTION: What value does the Channel of stones give?

ANSWER: The value of the channel is the revitalization of the work of the Muladhara, partially Svadhisthana chakras.

Note. Qi / Prana Channel Adjustment.

TECHNOLOGIES OF EVOLUTION

NOTE: What is Qi, Prana energy, where does it come from and why is it necessary?

The energy of Qi, Prana is the energy on which the organisms of people and animals work on Planet Earth.

Qi energy producers are plants that absorb the energy of the Sun and, through the process of photosynthesis, accumulate this energy in the form of chemical compounds. This energy is actively radiated by plant organisms around.

Animals and people eat plants and as a result of oxidation, energy is released, on which the organisms of animals and people work.

- In what frequency?

- The energy of Prana is found in the frequency of Manipura and in the frequency of Anahata.

The animal organism radiates part of this energy around itself.

The body works on this energy, plus this energy is consumed by the emotional and mental body. Thinking processes operate on higher frequency energy.

But this energy is necessary for the body, and therefore it is associated with the concept of health.

Fullness of energy of Qi-Prana is one of the indicators of health.

There is a planetary Qi Energy Channel.

In this channel, plants and animals radiate this energy, and a person consumes.

This is the energy of physical and social activity, endurance, it supports the emotional and mental sphere.

We started to test tuning with the Planetary Channel Qi in the Energy Personality Map.

You can clear the resonance with this Channel and increase the energy of the human Qi.

3.6. **Functioning of Additional Energy Supply Programs -**

Note. Energy supply programs are special programs, the development of highly developed civilizations that increase the nourishment of the human body at different levels.

At the moment, we have found that we can test and install 5 types of programs.

Type 1. Atlantic supply programs of 1 type

They give you +0 units of energy according to the level of consciousness.

Note: if supply programs produce less than 10 units, they are most likely in a dilapidated state.

These programs can produce 10+ energy units per level of consciousness.

Help in the assimilation and processing of information, the work of consciousness:

Details:

Type 2. Supply programs of 2 type (with fire elementals)

They give you +0 units of energy.

Supply programs add fire, increase human activity.

Details:

2. Atlantic supply programs of 3 type (high frequency)

They give you +0 units of energy according to the level of consciousness.

High-frequency Atlantic energy-supply programs energize the process of thinking, provide the energy necessary for embedding information in high-frequency thin bodies (Ajna level). A person absorbs information all the time. For its integration, additional high-frequency energy is needed, otherwise this energy will be taken from the life force of a person. This is necessary for embedding large amounts of information.

Details:

3. Supply programs of 4 type (low frequency, body level)

They give you +0 units of additional energy according to the level of consciousness.

Details:

4. Supply programs of 5 type (manual)

You give out +0 units of additional energy.

QUESTIONS AND ANSWERS:

QUESTION: There are Atlantic supply programs of 1 type. Issue 10 units of energy.

Can I put more? Will they issue 20? How relevant is it?

What is dangerous about it? Does everyone on the level of Vishuddha go or where?

ANSWER: It is possible to put 5 programs. It isn't dangerous. This thing is good.

Programs give out several frequency bands for energy supply, mainly according to Vishudha.

QUESTION: What is the difference between supply programs of 2 type with fire elementals and supply programs of 4 type (low frequency supply programs)?

ANSWER: Supply programs with fire elementals carry energy on the frequency of Vishuddha of the 1st and 2nd level.

Supply programs of 4 type (over the body) - the main frequencies are: Manipura and Swadhistana. Supply programs of 2 level increase motor activity more. There is a shift on the fire level, a person is accelerating relative to this world. A person even feels it less than others. People around him perceive him as an accelerated object. And people themselves usually see others as more inhibited. Any energy is somehow accumulated in the body.

But there is a specialized program that is designed for the energy of the body. This is a supply program of 4 type (over the body). It was installed in ancient times for soldiers, athletes, and also in cases where it was necessary to increase the sexual attractiveness of the body.

| 1 | Magic and emotional strikes (portions, evil eye, curses) on past lives on Earth in the Post-Atlantic period. | 4 units |
| 2 | Professional Runic strikes in the Post-Atlantic period (mental injuries). | 2 units |
| 3 | Professional magical strikes during the period of Atlantis (mental injuries). The use of high-tech magic strikes. | 4 units |

Magic and emotional strikes to past lives can have a profound effect on the current life. In highly developed civilizations, there were high-level specialists who could inflict a serious blow on you and greatly affect your life.

Special parameters (impact on health):

| | | |
|---|---|----------------|
| 4 | The presence of ancient strikes (military technology) related to health problems that have accumulated over earthly incarnations. | 3 units |
| 5 | Ancient strikes stimulating diseases 6 units is critical for this type of strike. It is advisable to clean. | 0 units |
| 6 | Negative dynamics - stimulates diseases. low 10-20% average 30-40% high from 50% and above. | 40% |

Note:

In this section, we test ancient professional strikes that are made using high-tech magic technology in highly developed civilizations.

These injuries can block the work of subtle bodies and entire systems of the body.

The cost of 1 cycle of cleaning mental injuries is 50 ye for past lives in the post-Atlantic period.
The cost of 1 cycle of cleaning mental injuries is 100 ye for other parameters (2-6) to choose from.
1 cleaning cycle of Mental injuries for each parameter removes 2 units of load (1.5 cycles removes the load of 3 units).

1 cleaning cycle reduces the load on the selected parameter by 2 units.

- Where percentages: 1 cycle increases activity by + 20% with parameter values below 60% and + 10% for values above 60%.
- Cleaning of ancient strikes that stimulate diseases - in 1 cycle, the load is halved.

FREQUENTLY ASKED QUESTIONS:

QUESTION: Are ancient strikes that stimulate diseases the same as Military technology related to health problems? Or is it still others? Do these parameters overlap somehow?

ANSWER: These are different processes. Military technologies apply some principles - and here others are applied.

QUESTION: If you look at this table, the question arises – what cleaning should I order? are all lines different things? Or are some of the lines mutually intersecting parameters?

ANSWER: We try so that the parameters do not overlap and when we can – we combine them. In connection with various diseases, we try to identify the cause and describe it as a service. There can be a lot of types of injuries and damages.

Once the strikes stood for a couple of million years, then other specialists also had difficulty in removing them. Each item is a separate task, not related to others. You can start with what's more relevant. First of all, it is worth paying attention to those parameters where the load is more than 2 units (or the degree of processing is less than 70%). Special attention can be paid to military strikes, strikes that stimulate diseases and runic strikes.

QUESTION: What is the best cleaning sequence for health? Or is it not important?

ANSWER: It is worth considering several parameters:

- 1) How many health problems you have in life - and how they intersect with our diagnosis. In this area of the body there can be various injuries (muscle loads, energy shocks, etc.). It is worth starting from the problem that exists.
- 2) You should pay attention to where the high load indicators are 3 units or more.
- 3) Special attention should be paid to strikes that stimulate diseases - this is a potential threat. It's better to clean it right away. And then you should focus on some specific problems: correlate the performance of the energy map and body map with current problems.

QUESTION: When ordering several cleanings at once - what are the discounts?

ANSWER: When repeating these cleanings, we do not have discounts. Usually, only 1-2 cleaning cycles for each parameter can be done. But we only have special discounts on Mental Recovery Technology and Monad Experience.

QUESTION: If we don't clean, where, when and how is it disappearing on its own? Prayer? Communion? Meditation? Afterlife?

ANSWER: We are dealing with strikes that usually do not disappear for 100,000 years, 500,000 years. These are parameters that are very stable, difficult to clean. The simple current strikes to this life can be reduced through meditation in the sun. If any strikes have stood for millions of years, then meditate, do not meditate, it will not change much. Afterlife, meditation - all this refers to the strikes of the current life. And if it has stood for millions of years, then you have already passed through all this damage, and most likely some specialists have already worked with it.

PART 5. SECURITY OF THE MENTAL OF BODIES AND SYSTEMS. HEALTH PARAMETERS

Note 1. In this section, we test the mental integrity of body systems, but we can not track the parameters of the physical deterioration of the body.

Note 2:

Strong residual signals of old age (2 units or more) reduce the performance of all systems. If you clean the signals of old age, usually the indicators become higher. Signals of old age reduce each indicator by 20 percent.

Note 3:

After 60 years, there is a natural damping of the body, associated with the age parameters of the human species. In the map we test basic parameters without system pressure. The age-related signals of the system reduce the indicated value by about 20-30 units/percent depending on age: At the age of 63-70 years: -20%, 70-75 years: -45%, 85-105 years: -60%. Developments related to aging are here: -

| No | Parameter | The stability of the body (system integrity) | Comments OK - if it is above 65% |
|----|--|--|--|
| 1 | Heart Work Muscle tension may affect heart function (see Body Map and Habits Map) | 55% | Good 70% + Average 60-70% Low 40-60% |
| 2a | The condition of the vessels | 55% | Good 70% + Average 60-70% Low 40-60% |
| 2b | Vascular patency (the presence of ancient damage to the vessels that can cause pressure) Note: For pressure problems, check a) whether there is damage to the system: magical tension of blood vessels b) muscle pressure is also influenced by pressure on the back of the head (tested in the Body Map). | 50 % | Good 70% + Average 60-70% Low 40-60% |
| 3 | Stomach Work | 50 % | Good 70% + Average 60-70% Low 40-60% |

Note. Several factors affect the functioning of organs and systems.

1) Firstly, it is the preservation of the mental state of organs (tested in this section).

Man-made disasters in past lives lead to serious mental breakdowns, which significantly affects the functioning of organs and systems. Mental tears can be restored.

2) Another factor is residual muscle tension. The consequences of stress and long illnesses in past lives twist thin bodies, which lead to disruption of the functioning of organs and systems. This indicator is tested on the Muscle Stress Map: _

3) And also the work of organs and systems are affected by inclusions in the destructive egregors. The impact of destructive egregors on health and life is studied in detail in the Habits Map _

We learned to test and fix some causes of damage to the work of organs and systems - / in the indicated directions /.

In complex diseases, several causes are usually involved.

We can remove some of them. In addition to these reasons, others can also influence. In these areas we are conducting research.

For example:

About 40-50% of men aged have problems with the prostate gland.

There are 2 points to this question:

Firstly, how much the body normally processes the energies of sexual tension (they accumulate or are processed). This parameter is measured in the energy map above.

Secondly, the presence of residual muscle tension (internal muscles in this area), which accumulate over many incarnations. This parameter is measured in the body map.

If you adjust these processes, then in 80% of cases the problem goes away.

But it is better to do this prophylactically than to treat an acute form.

Note.

This diagnosis does not primarily show the state of health, but the stability of the body systems, which, if imbalanced, can lead to health problems. Systems can be damaged due to mental injuries, military damage and magical shocks.

The integrity of the organ system is affected by the trauma of mental bodies, energy shocks, collisions with geopathic zones.

We monitor the integrity of mental structures and how energy works in these systems.

Notes.

The body may have point injuries, but they do not affect the functioning of the system. In diagnostics, we monitor the operation of the system as a whole, but we can skip some point damage. Therefore, if something specifically interests you, you can write a diagnosis for a more careful study.

You can find detailed information about the features of the systems and the ability to restore the health of organs and body systems in the articles of the section of our site "Magic Medicine"

| 3 | The presence of Water elementals (affects puffiness) | Can't be seen | stones |

Note:

For 1 cycle, we remove the elementals completely.

When adjusting the elementals, we remove the elementals and increase the processing of these energies.

AN EXAMPLE OF REVIEWS: Cleaning the earth elementals at the level of the kidneys/Anton

More than a year ago, the earth elementals were removed. I never complained about kidneys or sand. But today I was at the doctor's office, they did various tests, had an ultrasound of the kidneys, discussed the anamnesis ... We came to the conclusion that there was sand and there was a lot of it, now there is a bit left, just a little. In the future I will also order the removal of muscle clamps at the level of the kidneys. Thank you!

System Diagnostics Scale (Integrity):

- 75-100% - the system works stably. Adjustment as desired.
- 50-75% - the system is working. Problems are only possible in the future. Prevention is recommended.
- 25-50% - the system has serious functional damage. Desired adjustment.
- 0-25% - the system has critical damage that can lead to serious damage. It is advisable to take measures promptly. Follow the diet, maintain a healthy lifestyle or regulate with the help of the center's specialists.

You can adjust any parameter from the list.

|--|------------|--|

Note. Technology stress reduction. Adrenaline processing.

There are people who easily go into stress and then cannot calm down for a long time - they have an increased heartbeat, agitation, and cannot sleep for a long time after stress.

This is often due to the fact that the body does not properly handle adrenaline, which is released at the time of stress. If you increase the processing of adrenaline, then the person will become calmer and easier to get out of stress.

The average level of adrenaline treatment is 60-70%.

Above is a good level. Below 60% - low processing.

Entering into a stressful state (a person quickly ignites, can flare up) is often associated with the presence of fire elementals (for example, Kirkorov has fire elementals at the level of Anahata).

And how many people quickly calm down is associated with the adrenaline treatment.

For the body, it is desirable that this parameter be 75%</p> |
|---|---|------------------------------------|---|

QUESTION. Who might benefit from increasing the High Frequency Energy Processing setting?

A: People who work with Deities, prayers, icons, as well as those who have a strong dedication to egregore - this speeds up the processing of this information, reduces the loss of this information.

People who pray often (in church, etc.) receive an impulse of information in response. People who are included in some egregors periodically receive a portion of information.
 People who work with arkanas, elements, Higher allies, magicians who are in the subtle planes, during each contact receive a portion of energy and information from them.

The processing parameter of the high-speed information shows how quickly this information is absorbed. If information freezes, it feels like a strong overload. If the processing is poor, it can overload for a long time. Such people say that contacts with the Higher Planes overwhelm them greatly.

QUESTION: I have a very high figure of processing high-frequency information. What is the reason for this? The work of the upper chakras? Supply programs? Something else? Or is it some kind of separate "channel"? When ordering the cleaning of this parameter, what are you actually cleaning?

ANSWER: Mental injuries are removed during cleaning. Information comes to a person through the Assembly Point, chakras, in contact with other people, processes directly. The person receives information of a higher frequency than the position of the assembly point. It checks how this information is processed. Why it works is difficult to answer - these are just features of the energy structure.

QUESTION: What does "low level of human energy processing" mean in the personality's energy map?

ANSWER: A low level of processing of human energies leads, respectively, to a low level of processing of sexual energies.

Thus, there is a constant outflow of energy in the direction of processing information from a partner.

In this case, it is possible to recommend the cleaning of ties in Swadhistana and optimize the processing of human information.

ENERGY MAP: QUESTIONS AND ANSWERS

*Detailed information about diagnostic aspects
can be found in the Book of Development Magic
and in articles on the website:*

QUESTION: Explain what are the damage to energy?

ANSWER: There can be a huge amount of damage to the energy structure caused by a variety of factors.

Usually in the energy map of a person we test:

1. Energy breaks due to collisions with other people.

Conflicts of interest can cause the energy structure to clash with other people. If the complex to firmly defend its position is not removed, these clutches can lead to injuries of thin bodies and a constant drain of your energy to your partner, even if a conflict of interest has occurred a long time ago. This can lead to a decrease in your energy level.

2. Linking to geopathic zones.

You can also have clutches with energy when you are in places with geopathic energy (these can be Yin zones in space or zones with a sharp release of energy). Geopathogenic zones may be associated with the structure of the earth's crust or other factors. Also, in the area of geopathic zones, residential houses or professional institutions can be built. Being in areas with pathogenic energy can lead to the fixation of your subtle bodies and the gradual drain of your energy into these areas.

3. Magic strikes.

One of the factors significantly affecting a person's energy condition, his health, relationships, business, social success, etc. are targeted professional magical damage. Professional magical strikes can remain in human energy for tens or even thousands of years. These lesions can seriously block the manifestation of a person. The energy map diagnoses the presence of these strikes for the current and past lives of a person.

4. The mental trauma.

Mental trauma is deemed to be deep damage to a person's energy bodies. First of all, the bodies of consciousness (from the level of the body of Anahata and above).

Mental injuries can occur due to man-made disasters, military conflicts using powerful high-tech weapons, as well as due to professional ancient magical strikes.

Another significant factor that can lead to the rupture of subtle bodies are ancient inclusions in yin-cults.

TECHNOLOGIES OF EVOLUTION

About 5,000 years ago, a wide series of initiations into yin-cults took place, which, with great promotion, led to the drain of human energy into the yin-zones of space. These dedications have also caused serious mental injuries.

On average, one can distinguish the outflow of mental in people of 20-60%. This shows how much of a person's subconscious experience has leaked and is currently blocked.

This is a valuable personal experience that a person cannot rely on now. Mental breaks lead to a decrease in the level of human consciousness.

These damages can be removed as part of the Mental Recover and General Cleaning procedures.

Question on the Energy Map of the Personality: what are rewinds.

Answer: these are varieties of magic strikes.

Damage technologies are found in different schools.

You need to be careful and track the main types of magical damage, restore your condition in time.

Different types of strikes and rewinds are often common. There are also more complex types of injuries that were common during the period of Ancient Civilizations and sometimes there are quite stable thought forms, traces of which on some people have survived to our time.

These blows, as well as spoilage and other types of influences, rarely can really seriously interfere with a person, since the body is a fairly stable system, however, in large quantities, these damage gradually reduce activity, energy, and therefore it is important to periodically check and monitor your condition.

The main types of energy shocks can be removed in the framework of the Basic energy cleansing of a person. More complex types of damage, such as ancient magical strikes or mental tears, are removed as part of the Atlantis Cleansing Procedures, Military Strikes Cleansing and Mental Restoration procedures.

QUESTION about magic strikes, do you see this on the etheric body?

ANSWER: A magical strike is an aggressive thought form in terms of Vishuddha. Its main component is the mental body.

In general, the components of thought-forms are the mental body and its astral shell.

TECHNOLOGIES OF EVOLUTION

A magical strike is always someone's thought form, with the exception of those cases when they use an element of a dead person (they add earth) - then your bodies mesh on the level of ether and the astral body.

The thought form can be aimed at influencing some kind of human body.

Sustainable thought forms, as types of impact, can have both a healing and destructive effect for human energy.

QUESTION: I can't understand where all these energy damage, magical strikes came from. Who orders all this?

ANSWER: If you got somewhere earlier than others - the one who is behind will be unhappy. This is not a question of any people. This is a system process. Do not panic too much. But you need to be very careful and prudent, periodically monitor your condition and energy.

It doesn't matter what you develop: yourself, business or family.

The more success you have, the more there may be environmental resistance. This is a natural process.

The rocket when driving at high speed should be as tight as possible, without sharp corners, preferably without complexes and grievances.

Therefore, along with professional development, it is important to comb your personality, gradually removing ambitions, complexes, reducing friction and resistance with the world.

This is a long, thorough, but interesting process.

QUESTION: As for Vishuddha, I have activated it very much recently, as others are talking about - and, according to your diagnosis, I have a percentage of Vishuddha activity of only 35%. Could you comment on this?

ANSWER: Vishuddha energy cleansing techniques are usually common. Almost all the exercises that we met in esotericism are connected with the fact that a person pumps some energy through the chakra or mentally unwinds it, burns it, etc.

TECHNOLOGIES OF EVOLUTION

These techniques can basically fix some kind of garbage, pieces of ether that clog the chakra. But it's more efficient to remove high-frequency mental injuries that resonate with this frequency.

For example, injuries to the body of the Sahasrara that resonate with the chakra can affect its functioning. We look at serious injuries that greatly alter the functioning of thin structures. Of course, chakras can also get seriously clogged and this garbage can be cleaned - but this usually affects the work of the chakras by 5-10% of their potential, not more.

We understand that our work is difficult to verify, but we try to do it with the highest quality possible.

QUESTION: Do you have anything to fill the etheric body, like the mental (or something original?) Thickness (density) of the etheric body increases the stability of health (the thicker the layer the better).

ANSWER: We did not deal directly with these areas.

Of the technologies that we have announced, we have only the restoration of the silver thread.

It increases the concentration of subtle bodies. Including the density of the etheric body.

QUESTION: I received an Energy Map of the Personality.

What are the recommendations now? What is the best place to start?

ANSWER: In the Energy Map, the main parameters of the energy are diagnosed.

1) First of all, you should always pay attention if you have energy shocks at the moment.

If you do - it is recommended to do a cleaning - this will greatly facilitate your current condition, add tone and energy to other issues.

2) The second point – pay attention if you have any collisions with other people because of complexes of resistance to pressure and desire to pressure. If you do - it is recommended to clean these complexes - this will greatly facilitate your interaction with other people and will save you from many conflicts and energy breaks in connection with them.

Parameters of foreign anger, envy, not magical damage, links to geopathic zones are also cleaned with basic energy cleaning.

If there is a link to geopathic zones, you can additionally clean the house and office premises.

3) Next, pay attention to the section "Health Parameters".

After a general recovery of energy, it is recommended to pay attention to the parameters of the body systems. If you have a system integrity parameter of less than 50% for some organ systems, it is recommended that you pay special attention to these systems and restore their stability.

4) Periodically there are violations of the metabolism of trace elements, vitamins, processing of biotoxins. This affects the deficiency of trace elements in the body and the removal of harmful substances. This is a fairly relevant parameter in the conditions of our ecology.

If somewhere you have values less than 50% - it is also recommended to pay special attention to this issue.

5) The next item you can see the level of magic attacks on past lives and professional attacks in the period of Atlantis. If you clean these parameters, the load on the body as a whole will decrease and it will be more stable in operation.

You can do several cleaning cycles, depending on the situation that you have with this parameter.

6) The next step is to pay attention to the state of your Silver Thread. If necessary, you can restore its integrity or strengthen.

7) It is also recommended to pay attention to the dynamics of the chakras. If for some chakras you have values below 35%, you can clean and increase the dynamics of their work. Often this occurs in Anahata. Or you can carry out an activation cycle for all chakras.

8) Analysis and optimization of other parameters can be carried out at will to increase the efficiency of the body.

Other important parameters include:

- Activation of the Will Center,
- Connection with Planetary Channels (Power Plant, Animal Strength)

And you can also adjust parameters that reflect the strength and effectiveness of consciousness:

- Dynamics of the Assembly Point,
- Installing Energy Supply Programs,
- Activity of the left, right hemisphere and their synchronization.

These parameters can already be adjusted based on your wishes and a personal program to increase your effectiveness.

**QUESTION: I don't understand "people of the 4th caste." Is this a caste of magicians?
I learned that business is clearly not my occupation for the past several million years.**

ANSWER:

4 caste - people from Anahata and above. It can be magicians and businessmen, etc. - in accordance with the sphere of interests, mental injuries for millions of years of evolution are practically for everyone and everywhere.

QUESTION: WHERE TO START?

One of the most sought after technologies: [Basic energy cleaning](#)

To increase the overall tone and immunity, you can do a [cleaning of the premises](#) (home and office).

In general, harmonization and healing of the body takes place with a general [mental recovery](#).

At high energy costs, it is recommended that you install additional [energy supply programs](#).

An important parameter that affects the work of the body is the processing of old age signals and the work of a silver thread. See [Silver Thread](#) Detuning.

QUESTION: What do you recommend for health promotion?

ANSWER: The main technologies in this area:

Step 1. Mental recovery

Step 2. Clear the Communication System ("Standard of Health")

Step 3. A very important aspect is the speed of processing information entering the body.

This refers to the processing of incoming information from trace elements, vitamins, antioxidants, biotoxins, and information entered inside (from people). This is a very important structure, the basis of the body. It is important because the unregulated processes of assimilation of vitamins of trace elements leads to an imbalance of the body.

Step 4. Optimization of the work of the Channel of Animal of Strength, Stone of Strength, Plant of Strength These channels adjust the work of the chakras and organs in the area of the corresponding chakra. Stone of Strength - Muladhara, Plant of Strength - Swadhistana, Animal of Strength - Manipura.

Step 5: Work with local problems.

We have special technologies for working with [pressure, cholesterol, the work of the prostate gland](#), etc. This also includes the detuning of the parameters of the [Silver Thread](#).

Step 6. Another very important parameter is military strikes and health strikes. If there are signs of damage, [it is best to remove them](#).

Step 7. Then there is an increase in the dynamics of the chakras, [mental recovery](#) by the chakras, a [mental register](#) by the chakras.

Step 8. The [guardian angel](#) also affects health.

Step 9. You can establish Dedications that stimulate sports.

Articles: Principles of Health and Energy.

In order to develop rapidly, as well as just to live healthy and happy, it is important to have enough energy.

Many wars in the world are over the possession of energy resources. Likewise, for a person, tone, health, a sense of joy is associated with energy.

If a person complains of a breakdown, problems, we first recommend paying attention to

- a) the house where he lives: whether there are geopathic zones in it, outflows of energy;
- b) and also check for energy damage.

Current damage is cleared through

- 1) [Energy cleaning](#) and 2) [Cleaning the room](#).

And usually it greatly improves the overall tone of the person.

Our body is similar to a machine in which a large number of damage to fine structures has accumulated over millions of years of evolution - mental injuries. Mental injuries reduce the efficiency of organs and systems. But these damages can be removed!

First of all, for health, we can recommend

- 3) the general [mental recovery](#),
- 4) [The restoration of the Silver Thread](#) ("energy of life"),
- 5) as well as [the cleaning of military strikes during the evolutionary period](#),
- 6) You can also include a person in additional energy flows, which will increase the quality of his life: [Installing Energy Supply Programs, Activating a Plant of Strength, Activating an Animal of Strength, Activating the Chakra Dynamics, Cleansing Swadhistana Relations](#).
- 7) When working with any specific diseases, we can recommend
